Cahier de tests — Intelligent Billing & Payment

Produit : Intelligent Billing & Payment

Environnement : https://app.dev.intelligent-eu-bp.blooo.dev

IdP : Keycloak realm `int` (thème Volt INT-332)

Mot de passe (tous) : `Intelligent-UAT-2026!`

Communauté démo : Horizon Energy

Tickets : INT-282 … INT-285 · refresh captures INT-333

> Ouvrir en aperçu Markdown (GitHub / IDE) pour voir les captures. Version imprimable : cahier-de-tests-demo-intelligent-billing-and-payment.pdf.

Comment lire ce cahier

Trois parcours **sur la même communauté** Horizon Energy :

Parcours	Persona	État seed	Objectif démo
A — Onboarding complet	Hugo Moreau	`Invited` (seed)	Profil → CGU → carte (wizard from scratch)
B — Argent	Léa / Thomas / Claire / Marie	Léa `TermsAccepted` ; producteurs Ready	KYC, run, factures, Pay
C — Invite live	Marie → nouvel invité	—	CSV Invite (REQ-008) → Mailpit → 1re connexion

Subtilité UI — barre latérale (INT-254)

Un **membre** (pas manager/operator) **sans statut Ready** n'a **pas de sider** : seulement le header + le contenu (« setup chrome »).

Dès que le payment setup est Ready, le menu gauche apparaît.

Ce n'est **pas** un bug si Léa ou Hugo voient Invoices / Balances sans menu.

Empty states vs bugs

- Message du type « No unbilled balances yet » / « No payments yet » = **état vide attendu**.
- Un **spinner** seul = capture trop tôt ou API lente — **pas** l'écran final.

Personas Horizon Energy

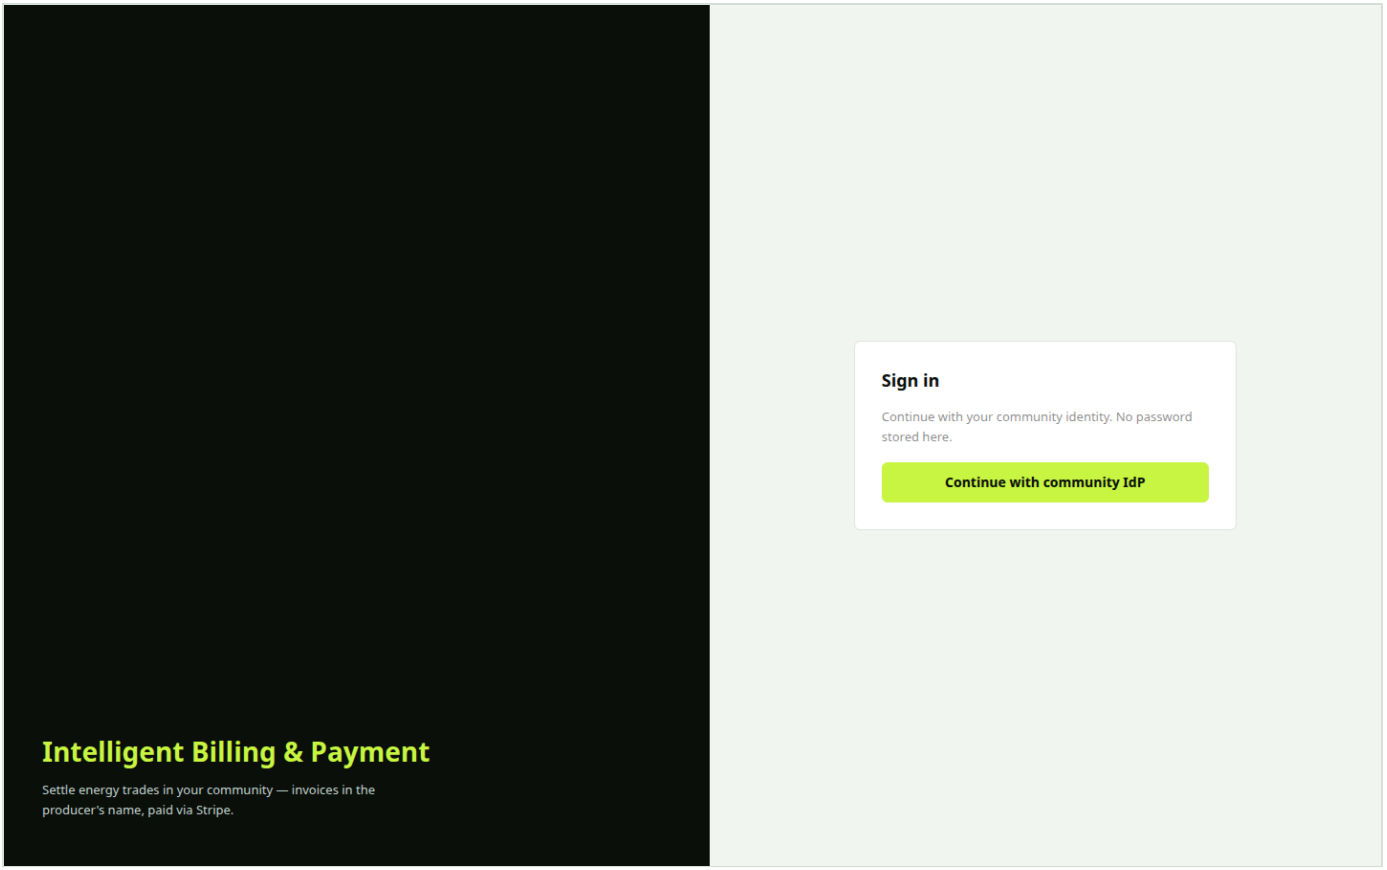

Persona	Login	Rôle	État attendu au login
Hugo Moreau	`hugo.moreau`	Consommateur Invited	Wizard étape 1 — profil à saisir
Léa Martin	`lea.martin`	Consommatrice	Profil + CGU déjà OK ; payment à finir
Thomas Bernard	`thomas.bernard`	Producteur A	Ready (KYC fait) + sider
Claire Dubois	`claire.dubois`	Productrice B	Ready + sider
Marie Leroy	`marie.leroy`	Gestionnaire	Console manager + sider
Paul Nguyen	`paul.nguyen`	Opérateur	Operator desk (communauté UAT IdP ; outils plateforme)

UAT (e2e uniquement, autre communauté) : `hugo.petit` / `sofia.garcia` — **ne pas utiliser pour la démo Horizon Energy**.

---

1. Connexion

#	Action	Attendu	Pass
1.1	Ouvrir l'URL	**Intelligent Billing & Payment** (écran AC-01)	[ ]
1.2	Continue with community IdP	Keycloak Volt : titre **INTELLIGENT Billing & Payment Login** au-dessus du form centré, CTA lime	[ ]
1.3	Login + mdp	**Sign out** visible	[ ]

> IdP (après Continue) : fond ink, titre lime centré au-dessus de la carte blanche — **pas** l'ancien thème PatternFly bleu / marque à droite.

---

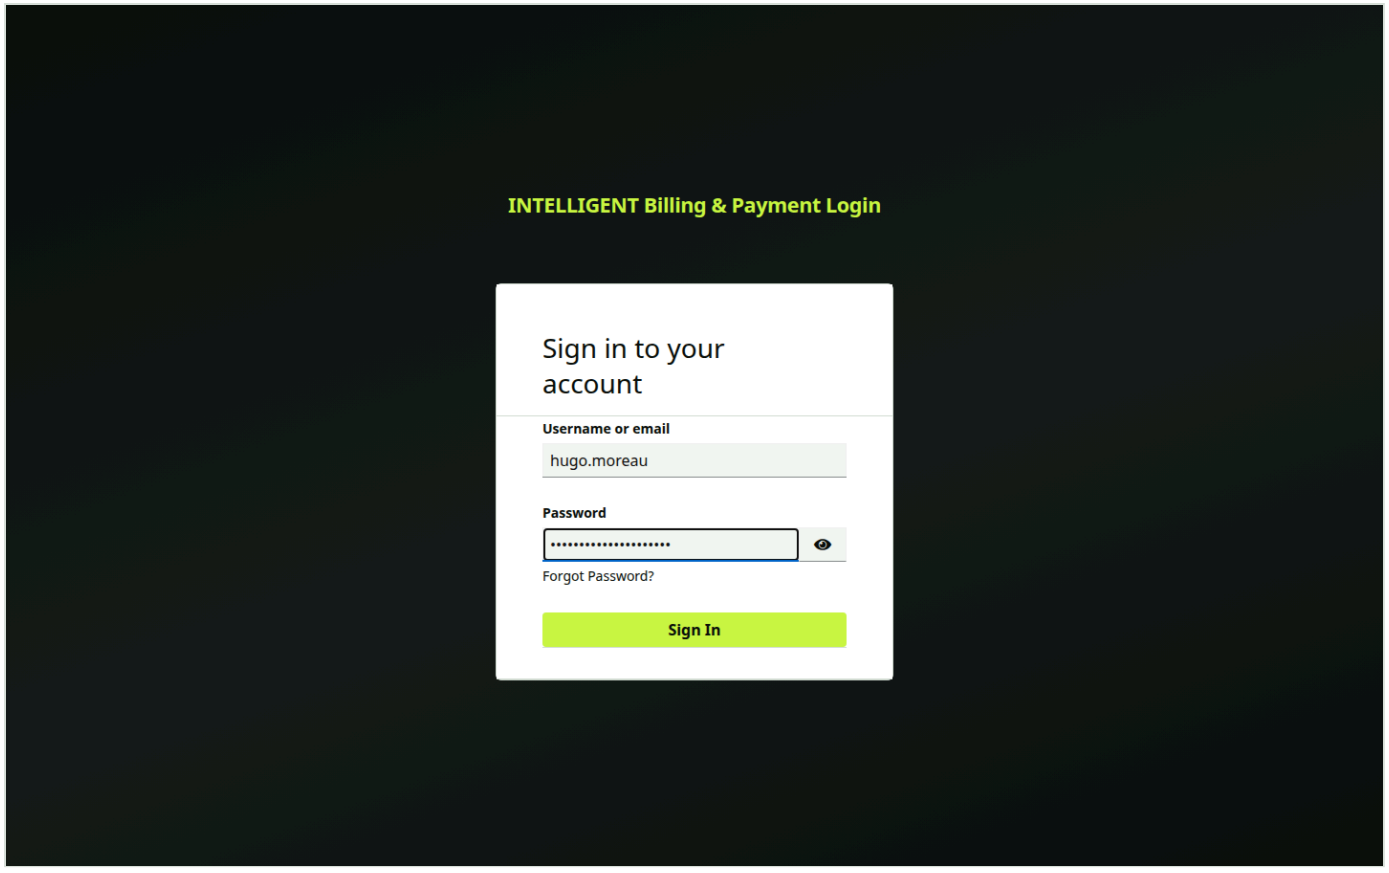

2. Parcours A — Hugo Moreau (onboarding from scratch)

Pourquoi Hugo et pas Léa : le seed S1 pré-accepte profil/CGU pour Léa afin d'enchaîner factures/Stripe. Hugo est un **2e consommateur Invited** sur Horizon Energy (INT-285), sans toucher Léa.

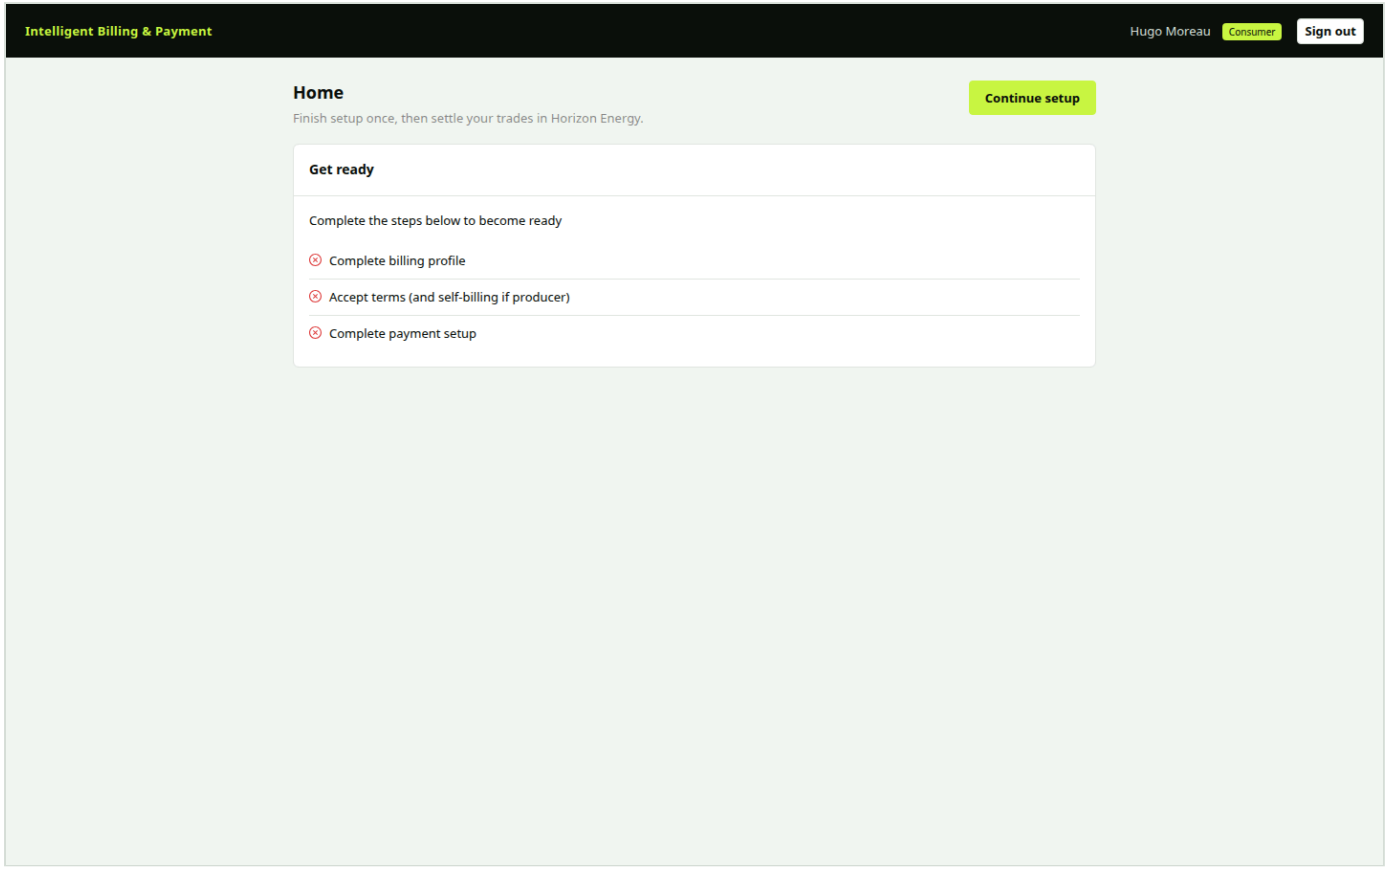

Données à saisir

Étape	Champ	Valeur
Profil	Nom	`Hugo Moreau`
Profil	Adresse	`8 avenue Victor Hugo, 75016 Paris`
Profil	E-mail	`hugo.moreau@example.invalid`
CGU	Acceptation	cocher version affichée
Carte	Numéro	`4242 4242 4242 4242`
Carte	Exp / CVC / CP	`12/34` / `123` / `75016`

2.1 Login

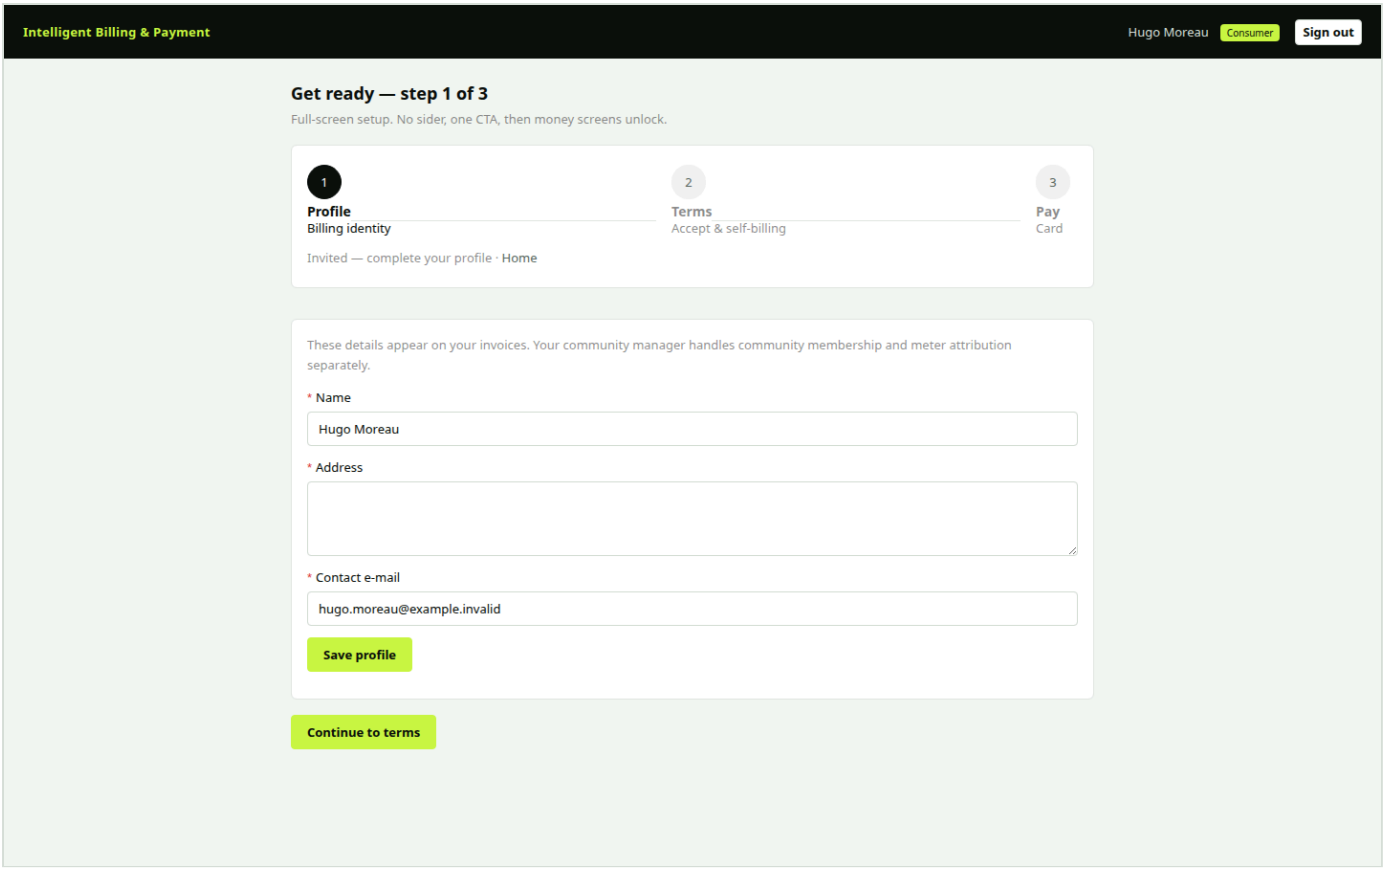

2.2 Home — Get ready (rien de pré-coché)

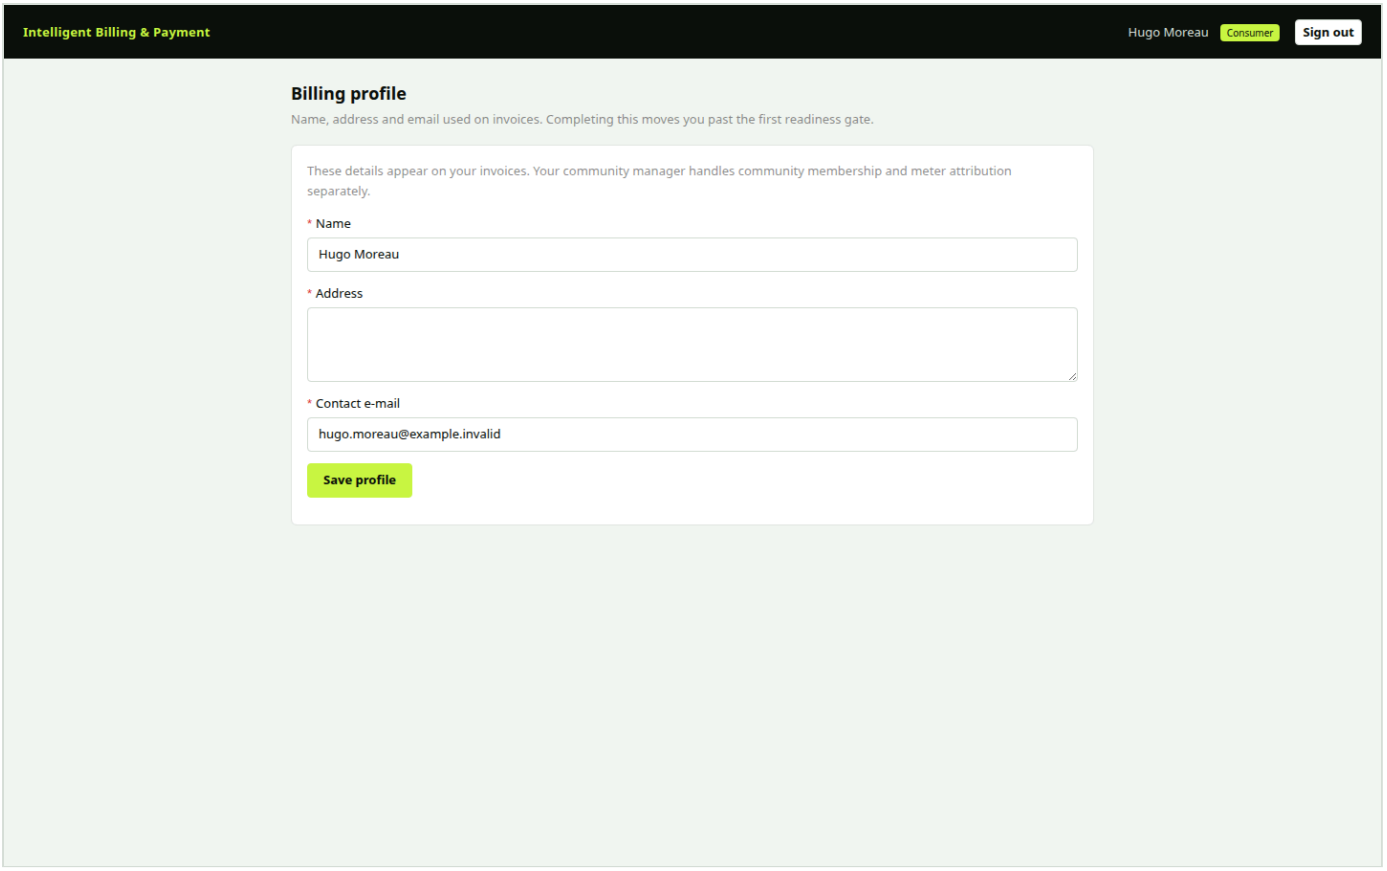

- [ ] Checklist : profil / terms / payment **pas** déjà verts
- [ ] **Pas de sider** (setup chrome)
- [ ] Communauté Horizon Energy (si affichée) ou parcours Get ready

2.3 Onboarding wizard

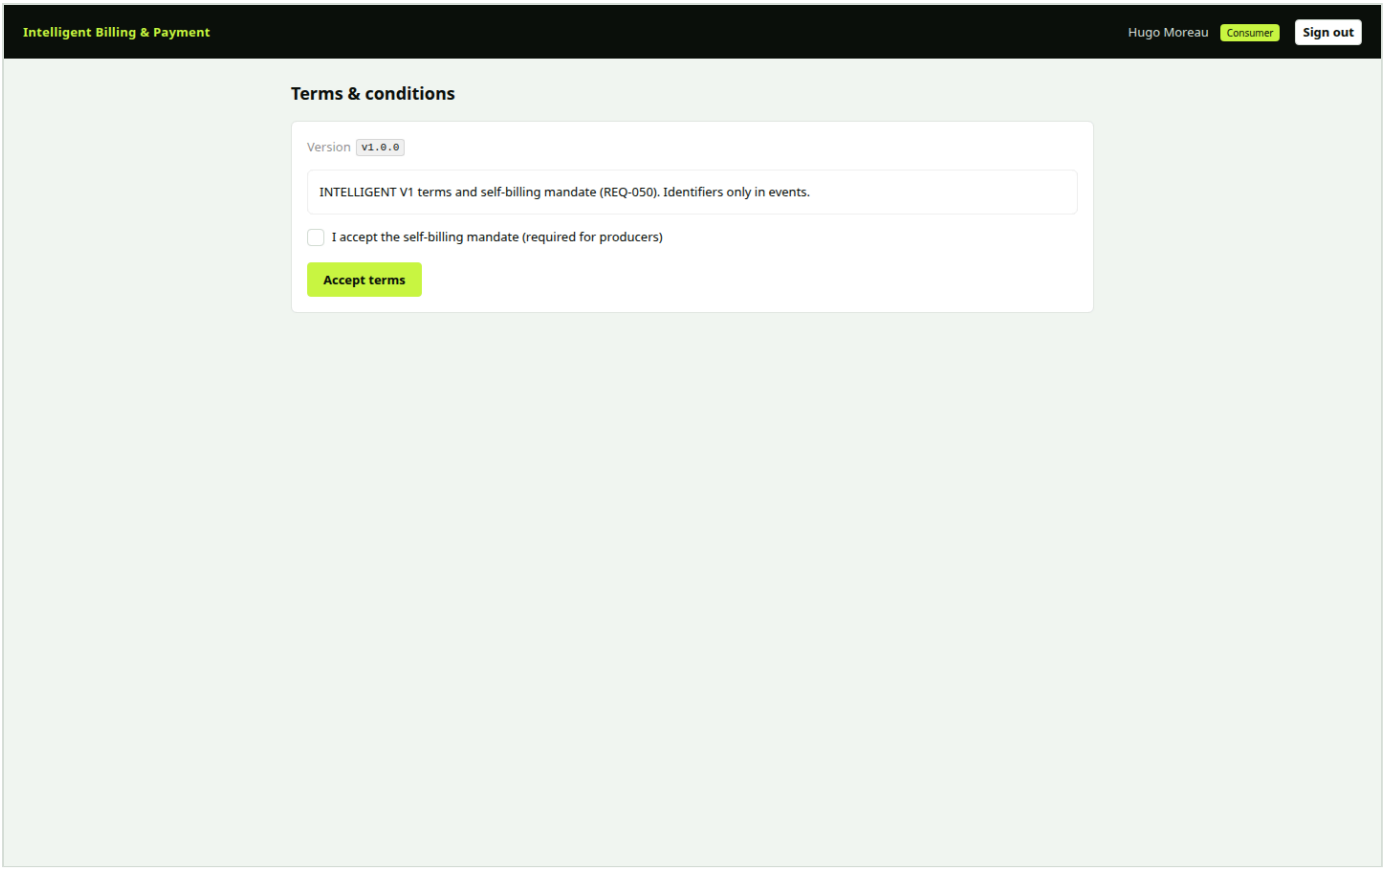

- [ ] Étape 1 Profile active, formulaire à remplir

2.4 Profil

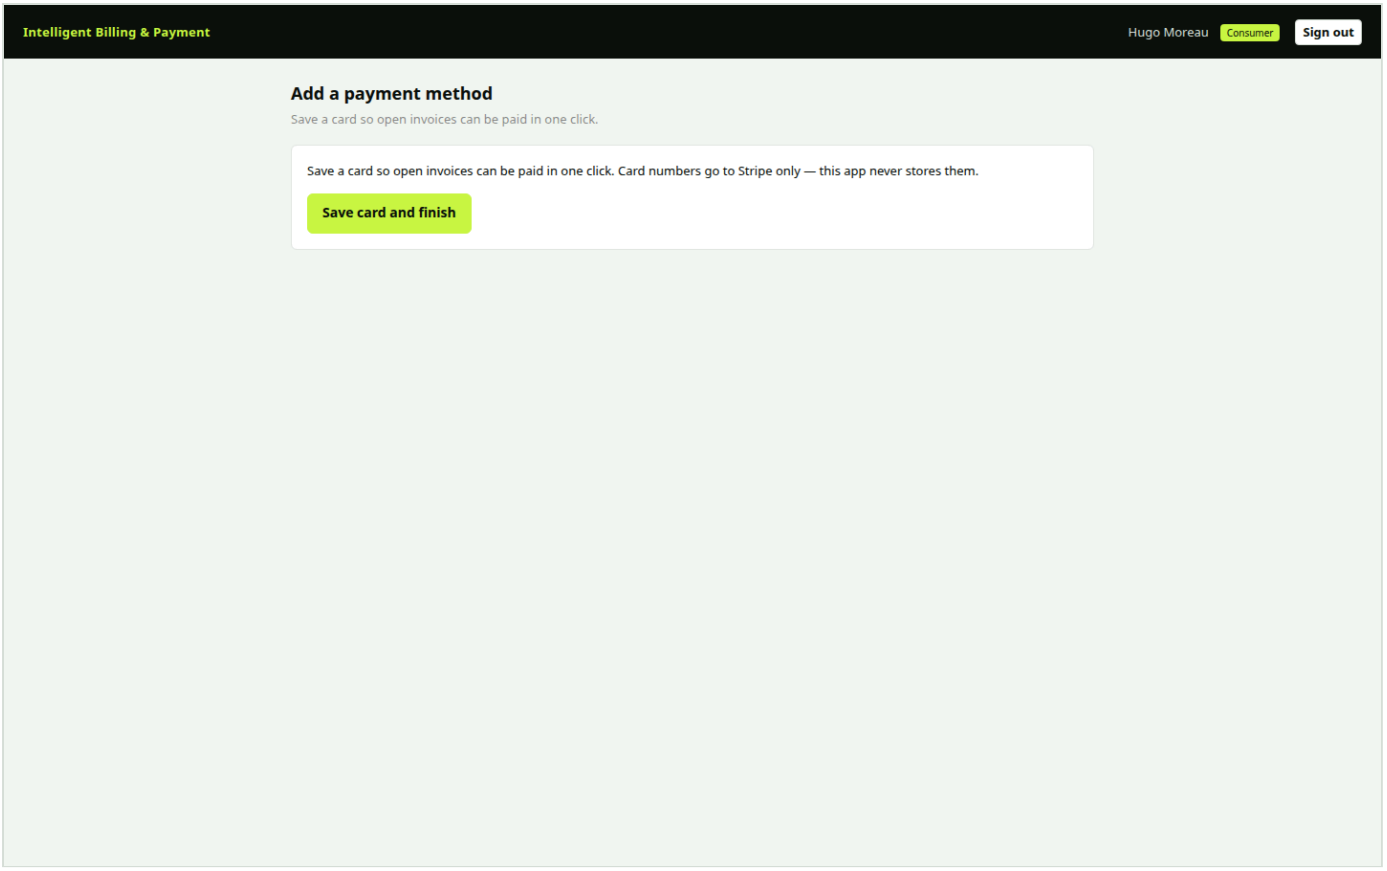

- [ ] Save profile → étape Terms

2.5 Terms

- [ ] Accept → étape Pay

2.6 Payment setup

- [ ] Carte enregistrée → Ready → **sider apparaît**

Checklist Hugo

- [ ] Parcours Invited → Ready sans étapes déjà cochées
- [ ] Sign out

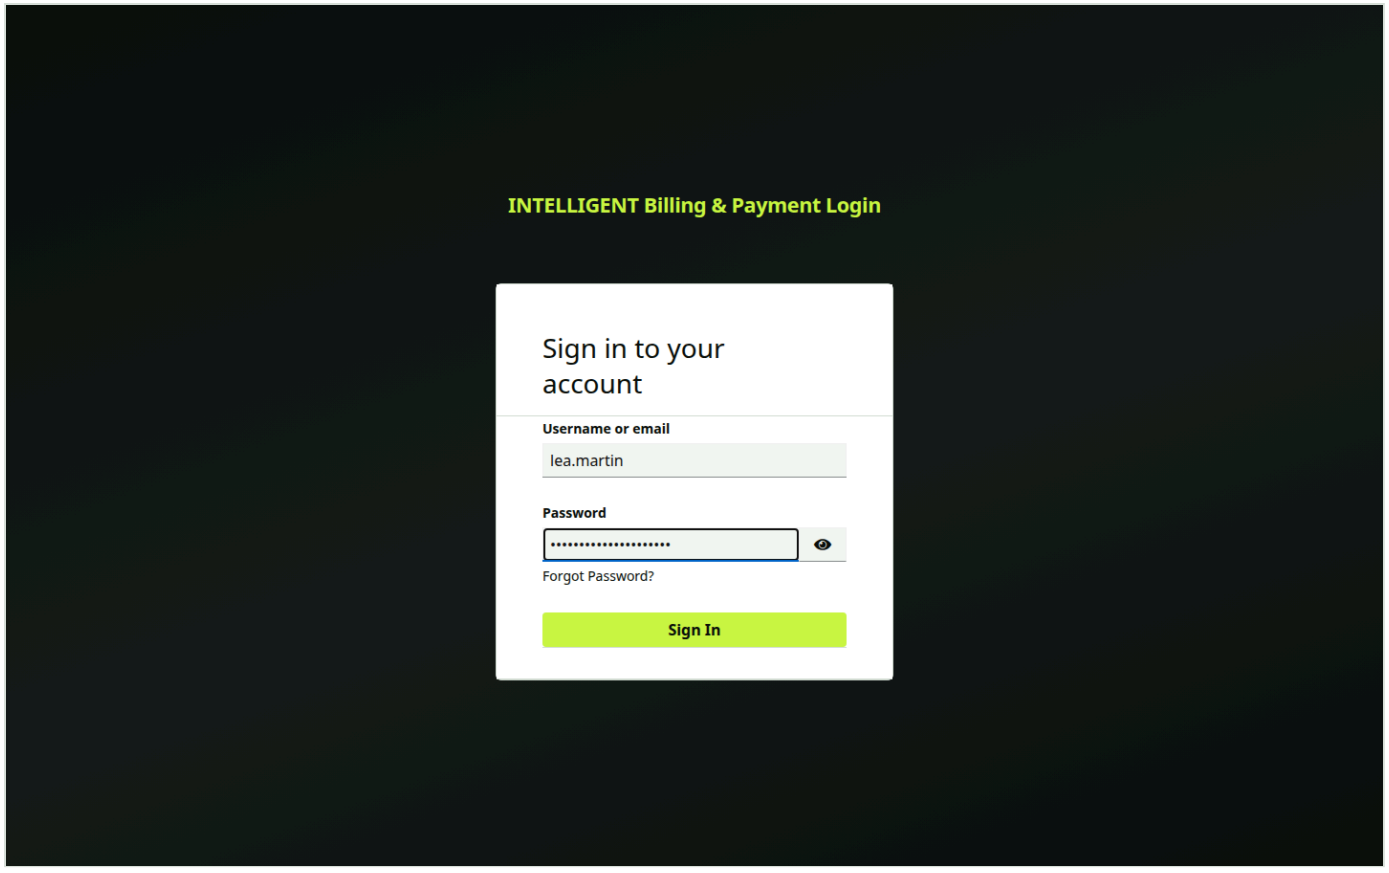

---

3. Parcours B — Léa Martin (argent / payment restant)

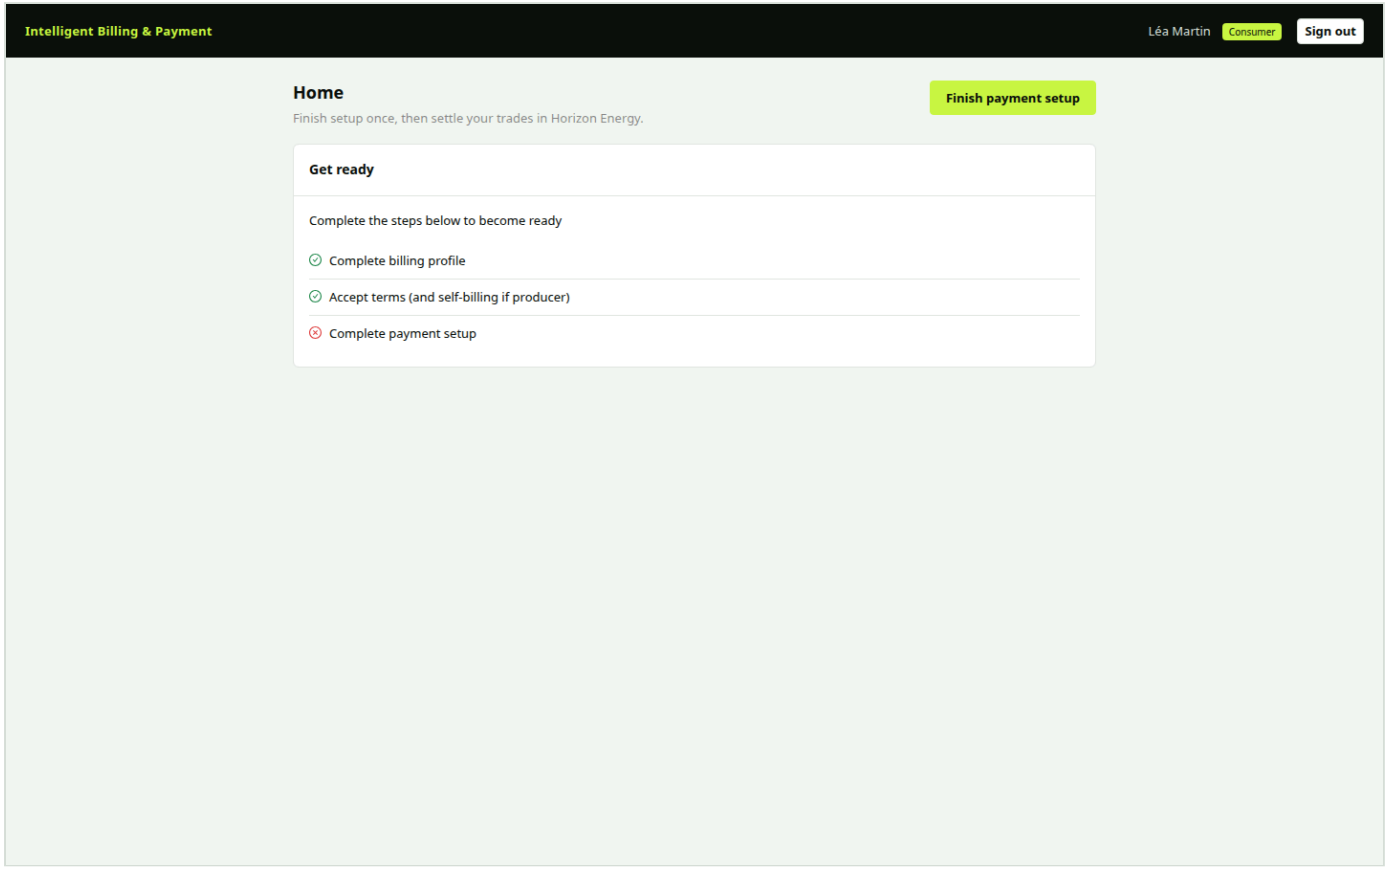

État seed : profil + CGU **déjà OK** ; seul « Complete payment setup » reste.

Ne pas refaire le profil/CGU — ce n’est pas le parcours onboarding.

3.1 Login

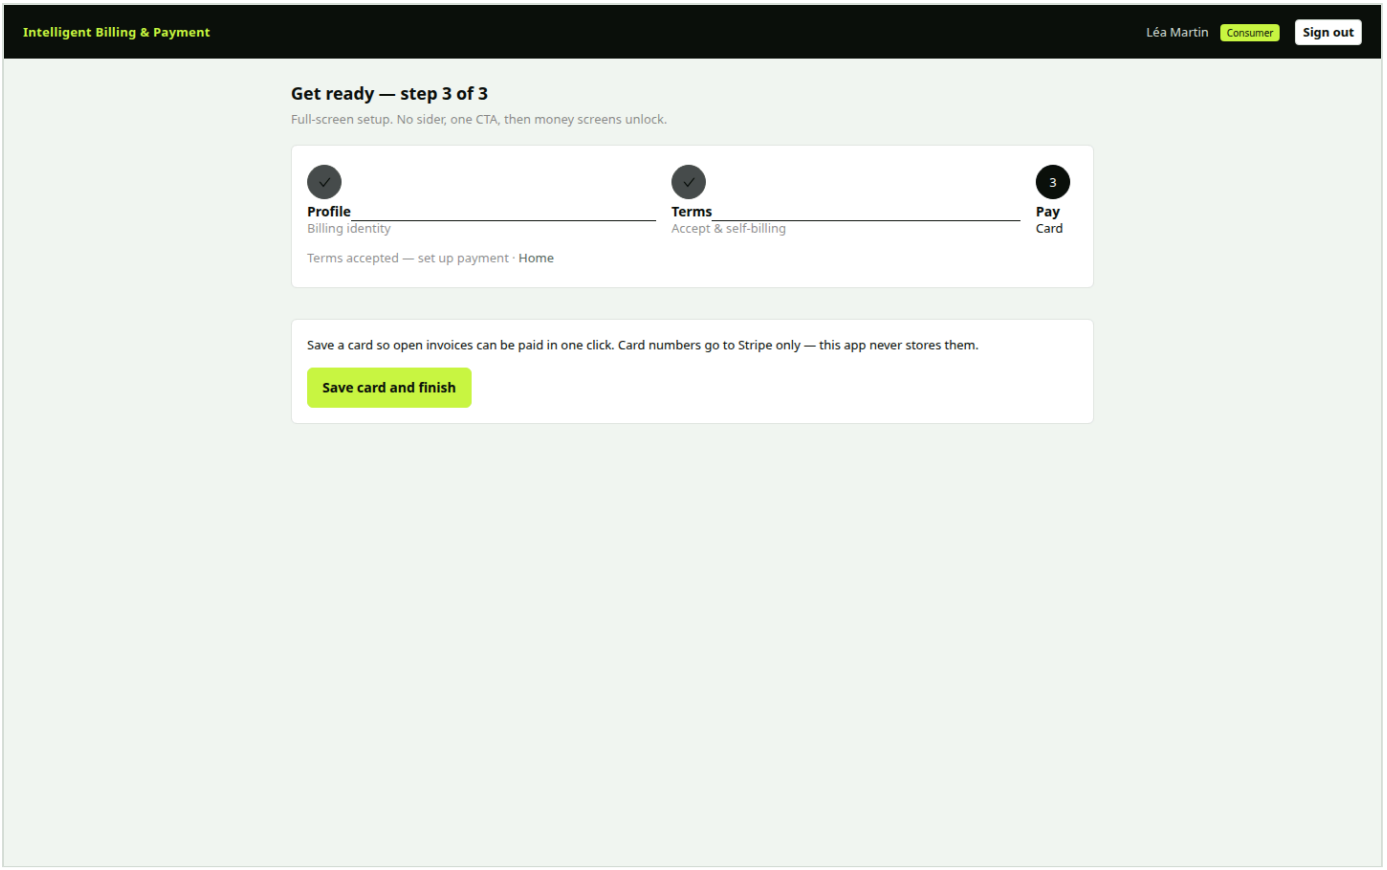

3.2 Home — deux checks verts, payment rouge

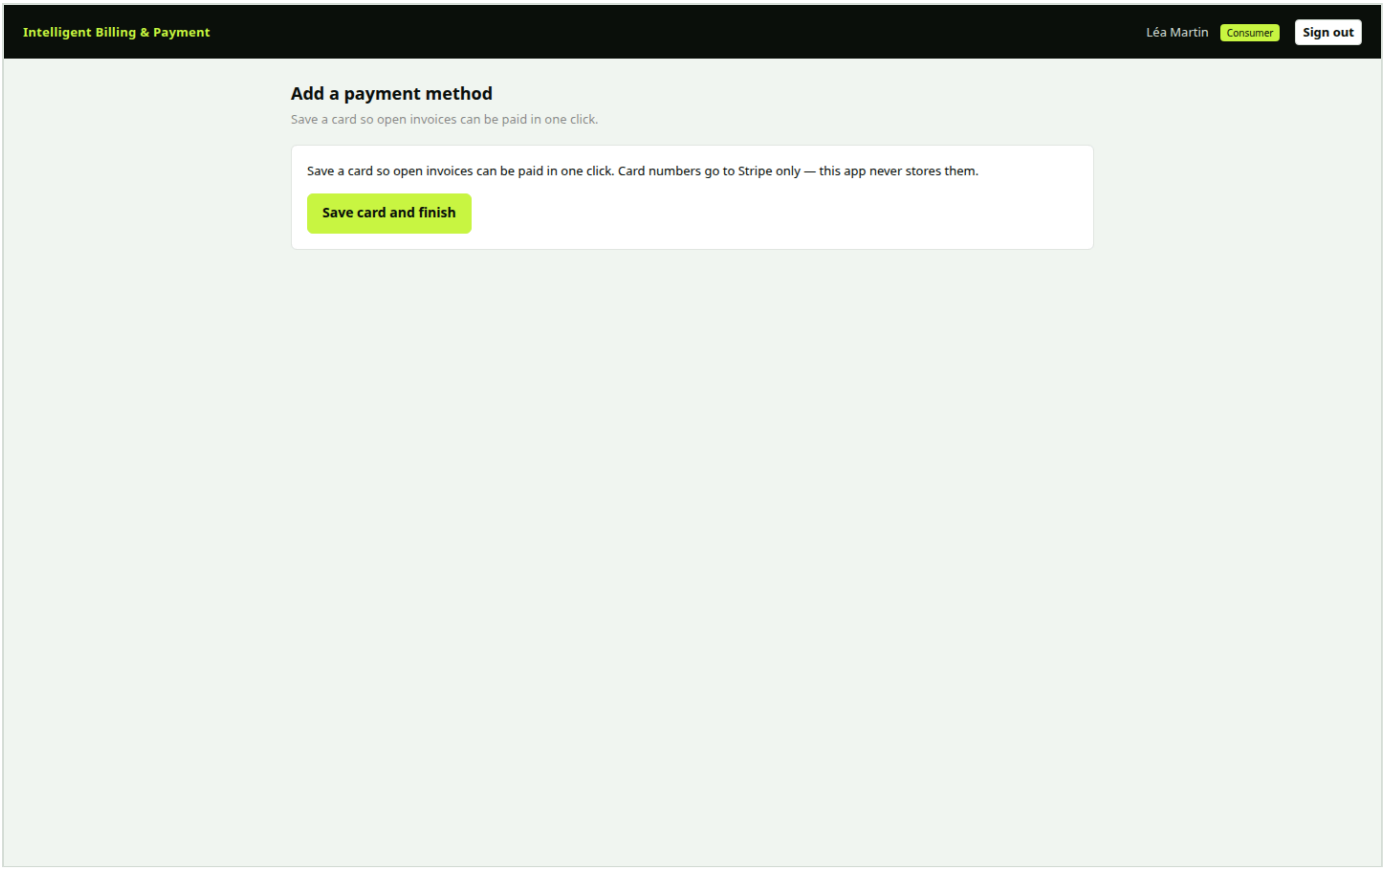

- [ ] **Léa Martin** / Consumer
- [ ] Pas de sider tant que non Ready
- [ ] CTA Finish payment setup

3.3 Onboarding (raccourci payment)

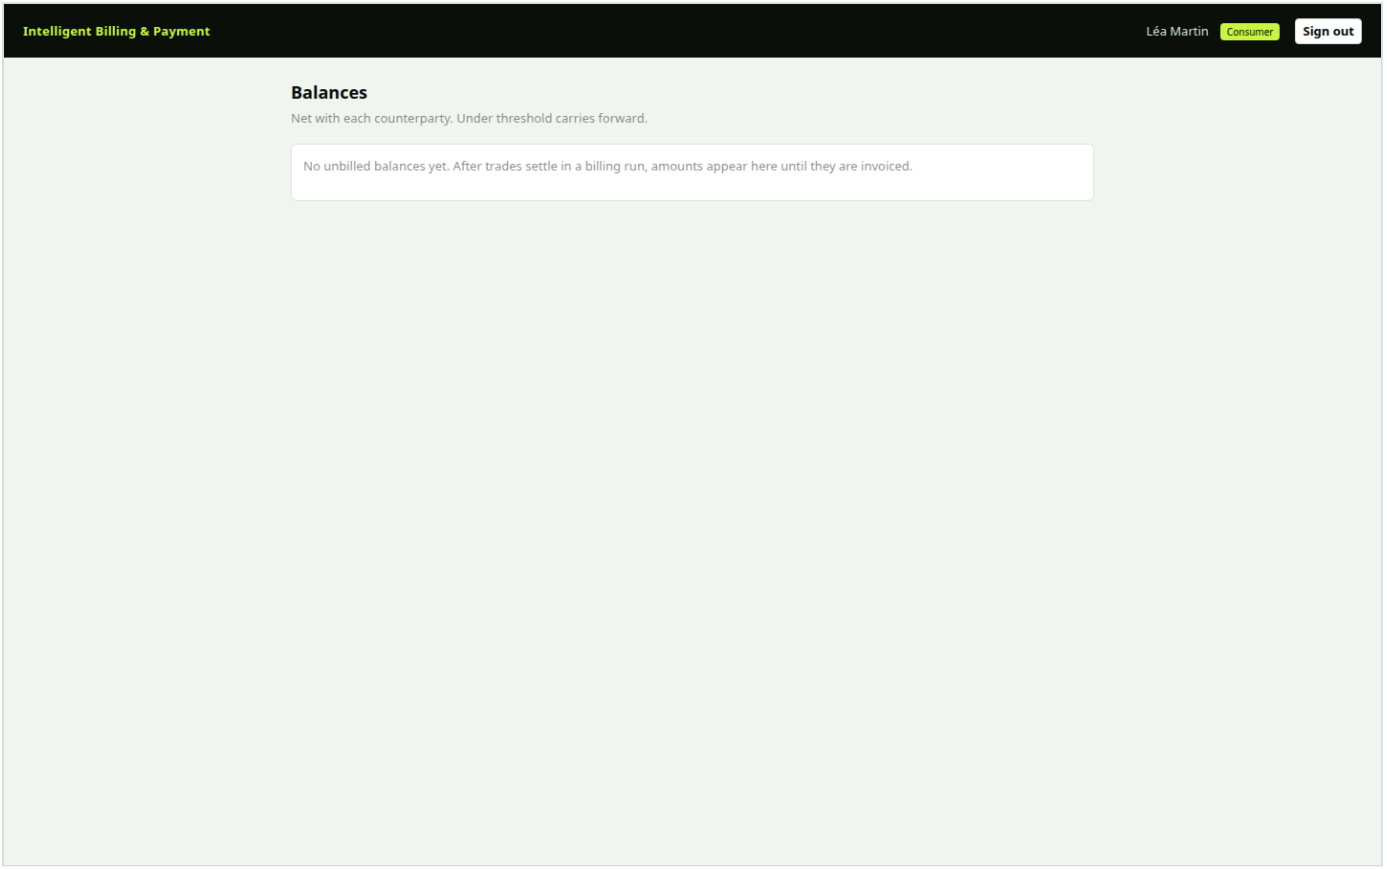

3.4 Payment setup

Champ	Valeur
Carte	4242 4242 4242 4242
Exp / CVC	12/34 / 123

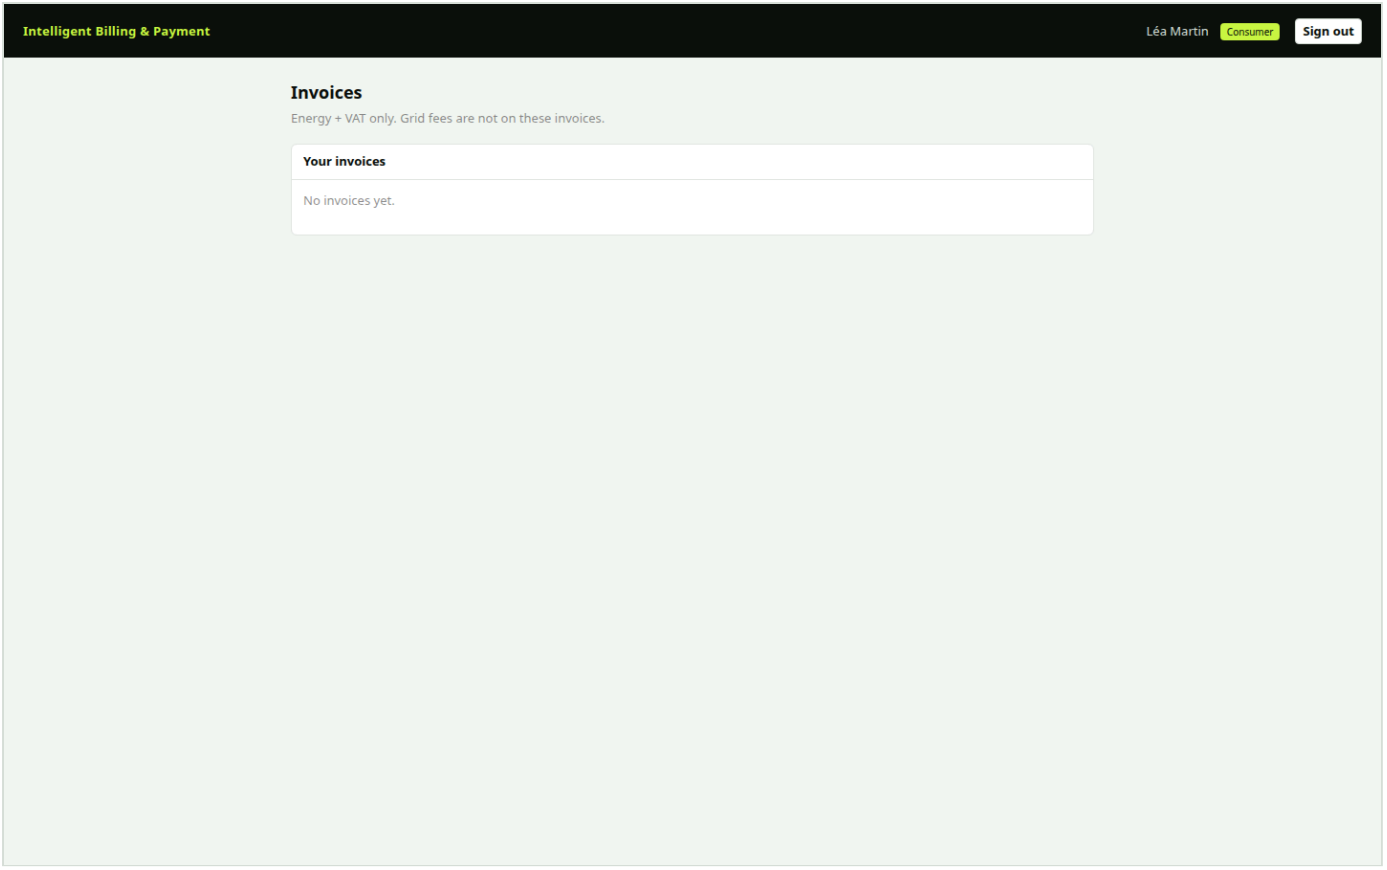

- [ ] Payment method ready

3.5 Balances (empty state possible)

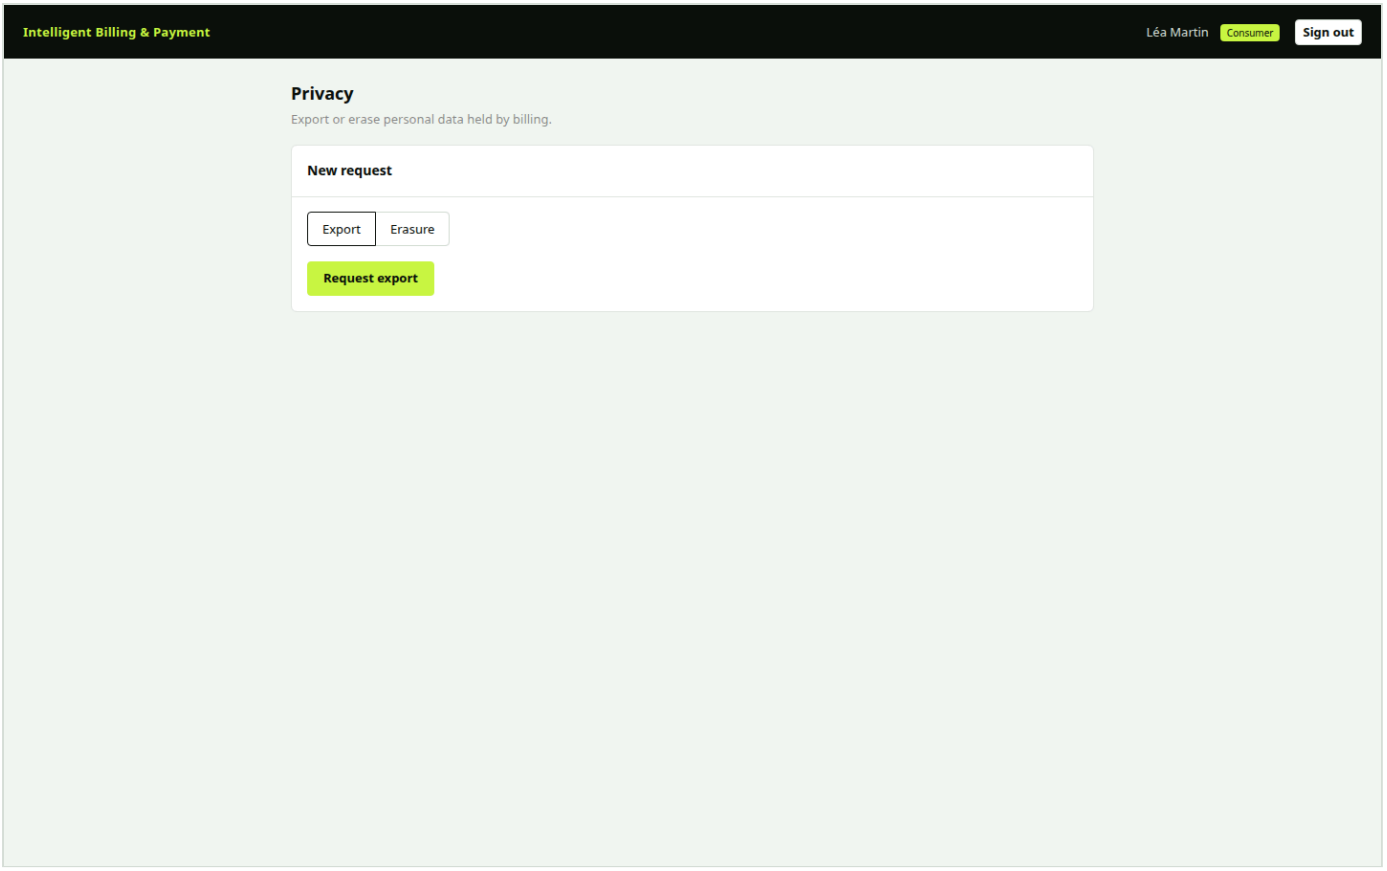

> Si « No unbilled balances yet » après un run qui a tout facturé → **normal**.

3.6 Factures / PDF / Pay

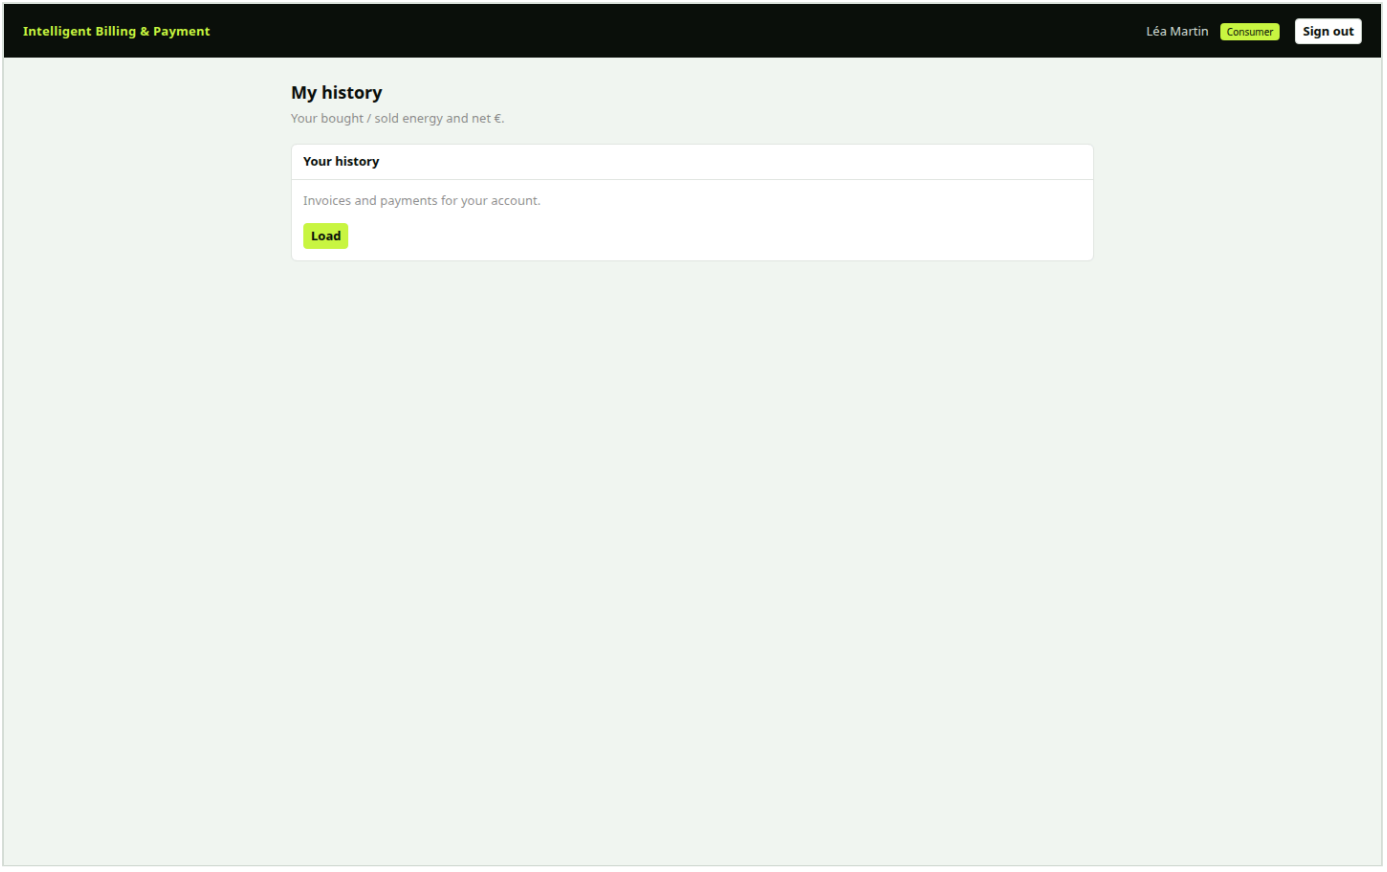

- [ ] Factures Open (après run Marie) ≈ 2,00 € et 2,64 €
- [ ] Sans sider si encore non Ready ; avec sider une fois Ready
- [ ] Open PDF — **pas de frais réseau** (A20)
- [ ] Pay → Paid

3.7 Privacy

3.8 My history

Checklist Léa

- [ ] Payment setup (seul step manquant au seed)
- [ ] Factures + PDF + Pay
- [ ] Privacy

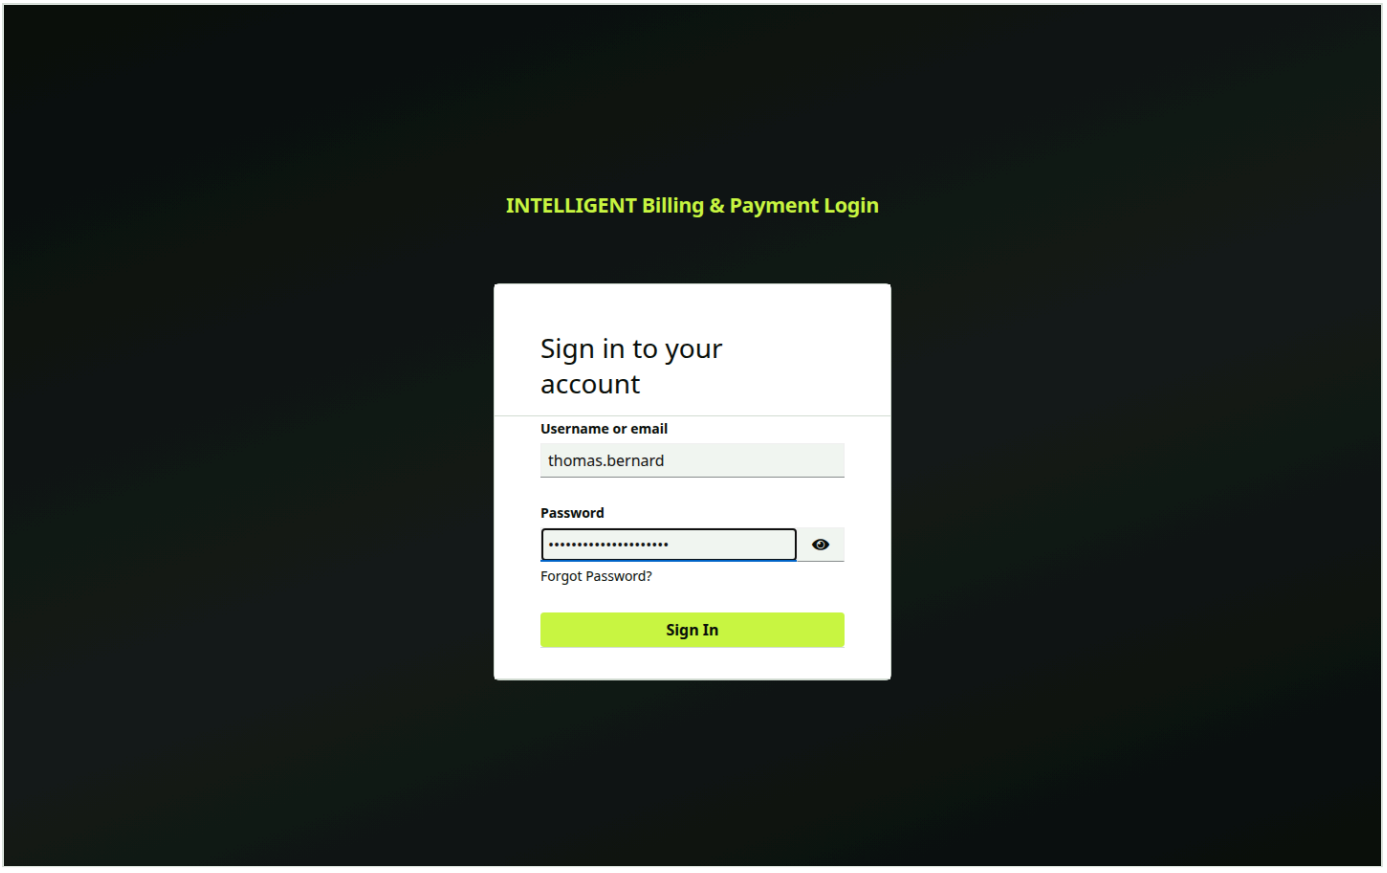

---

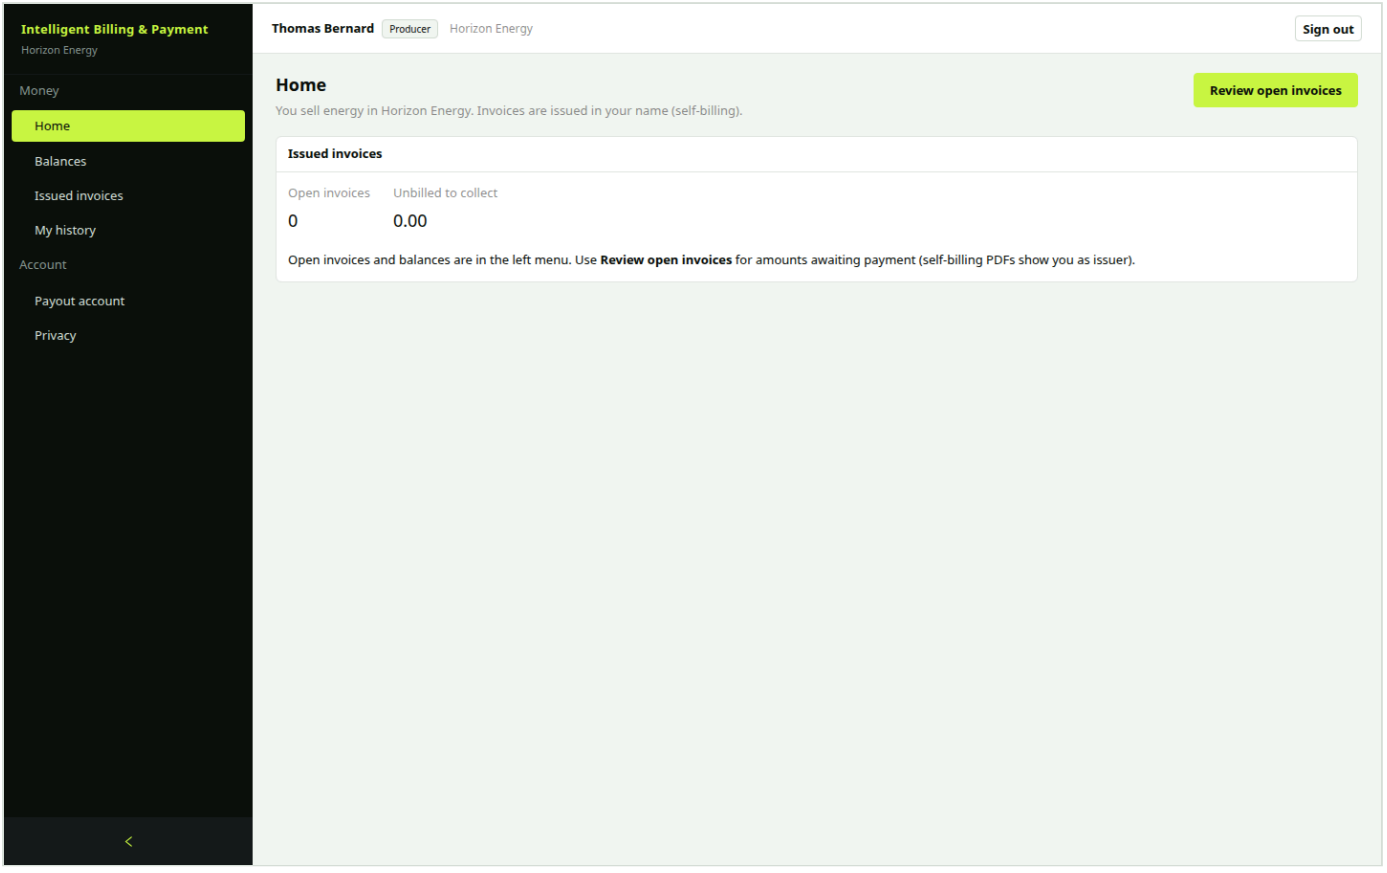

4. Thomas Bernard — Producteur A (KYC)

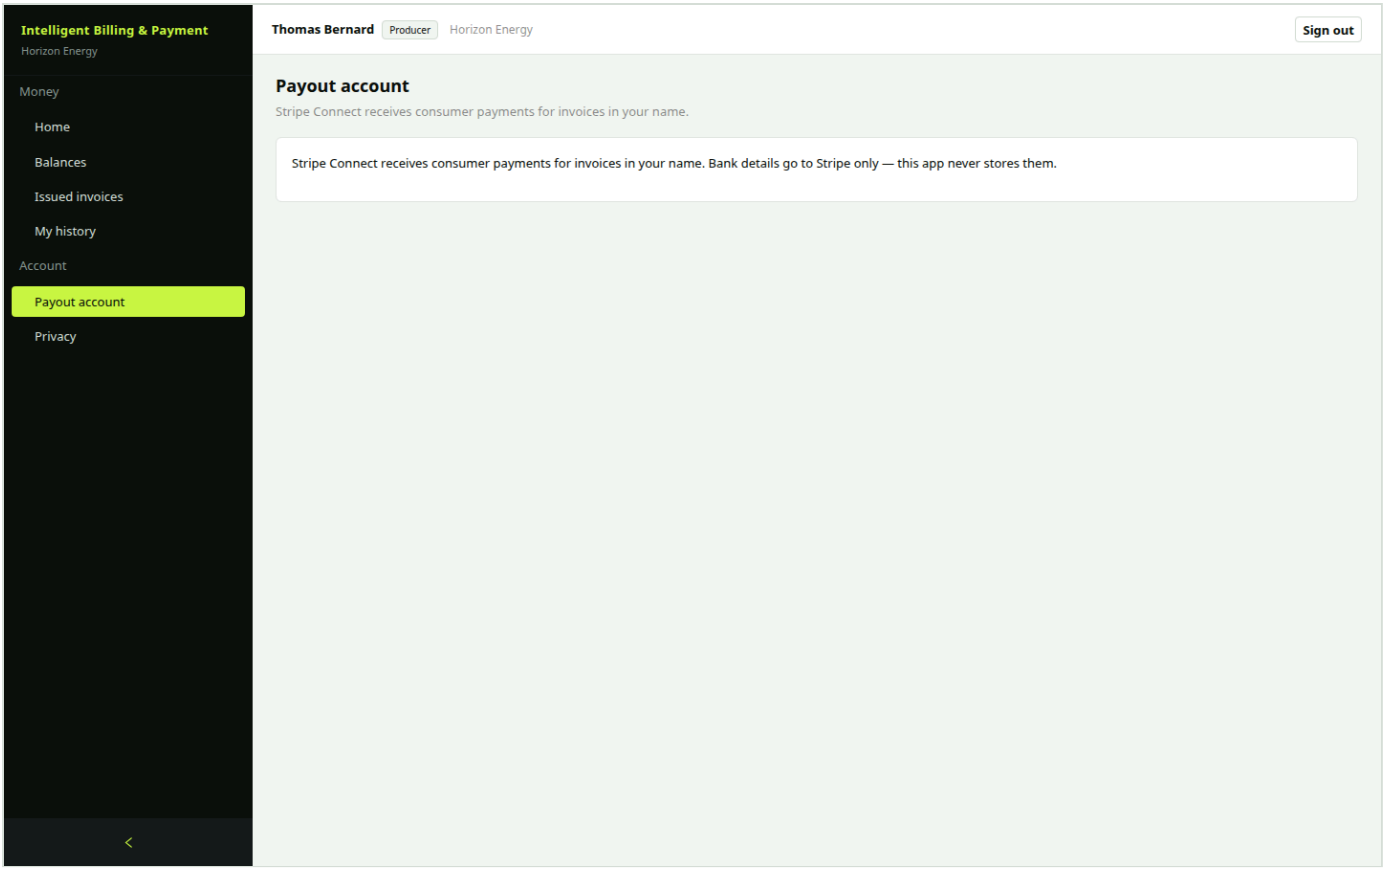

Ready → **sider visible**.

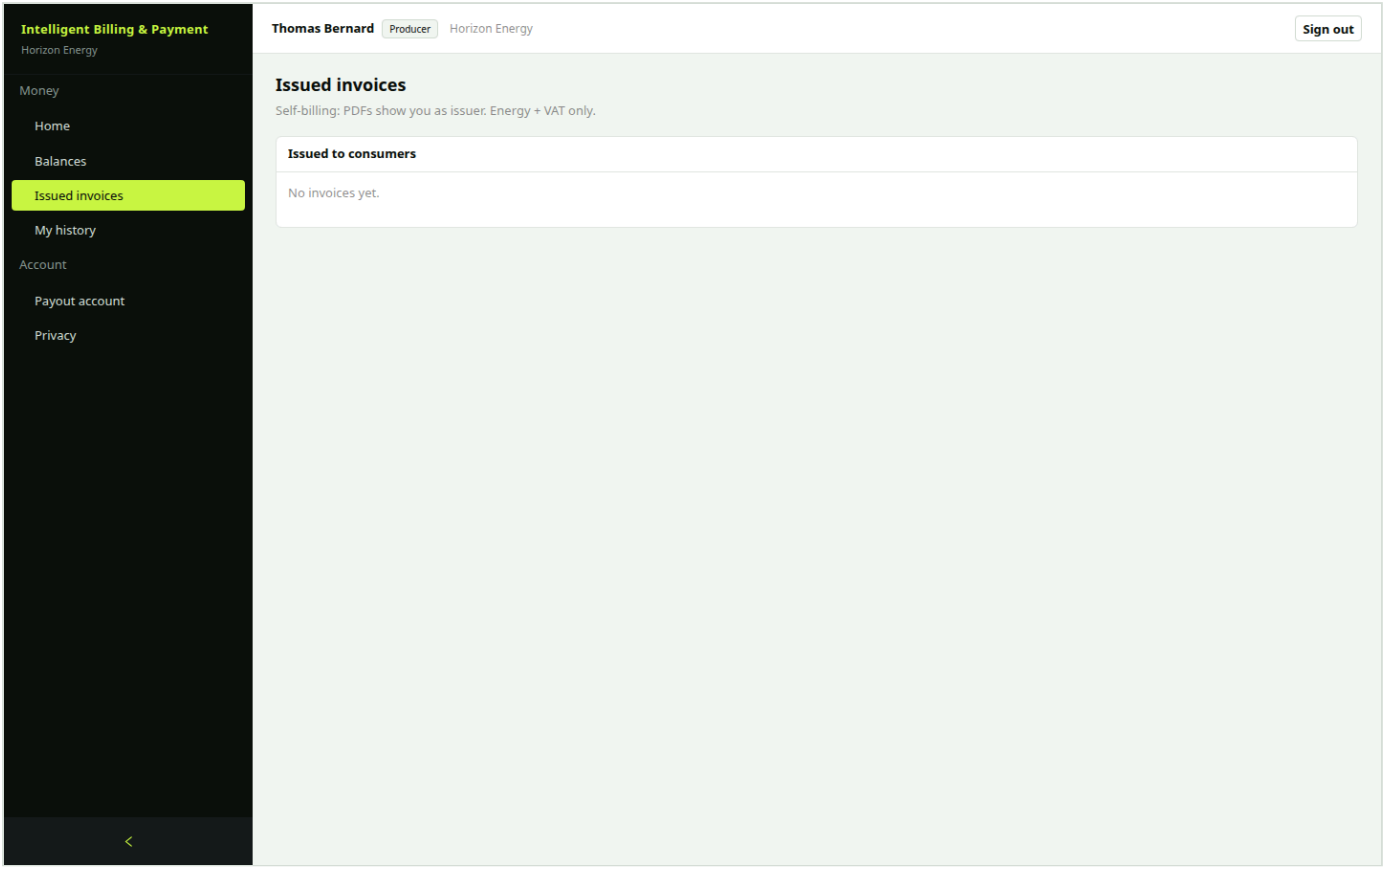

KYC Stripe test

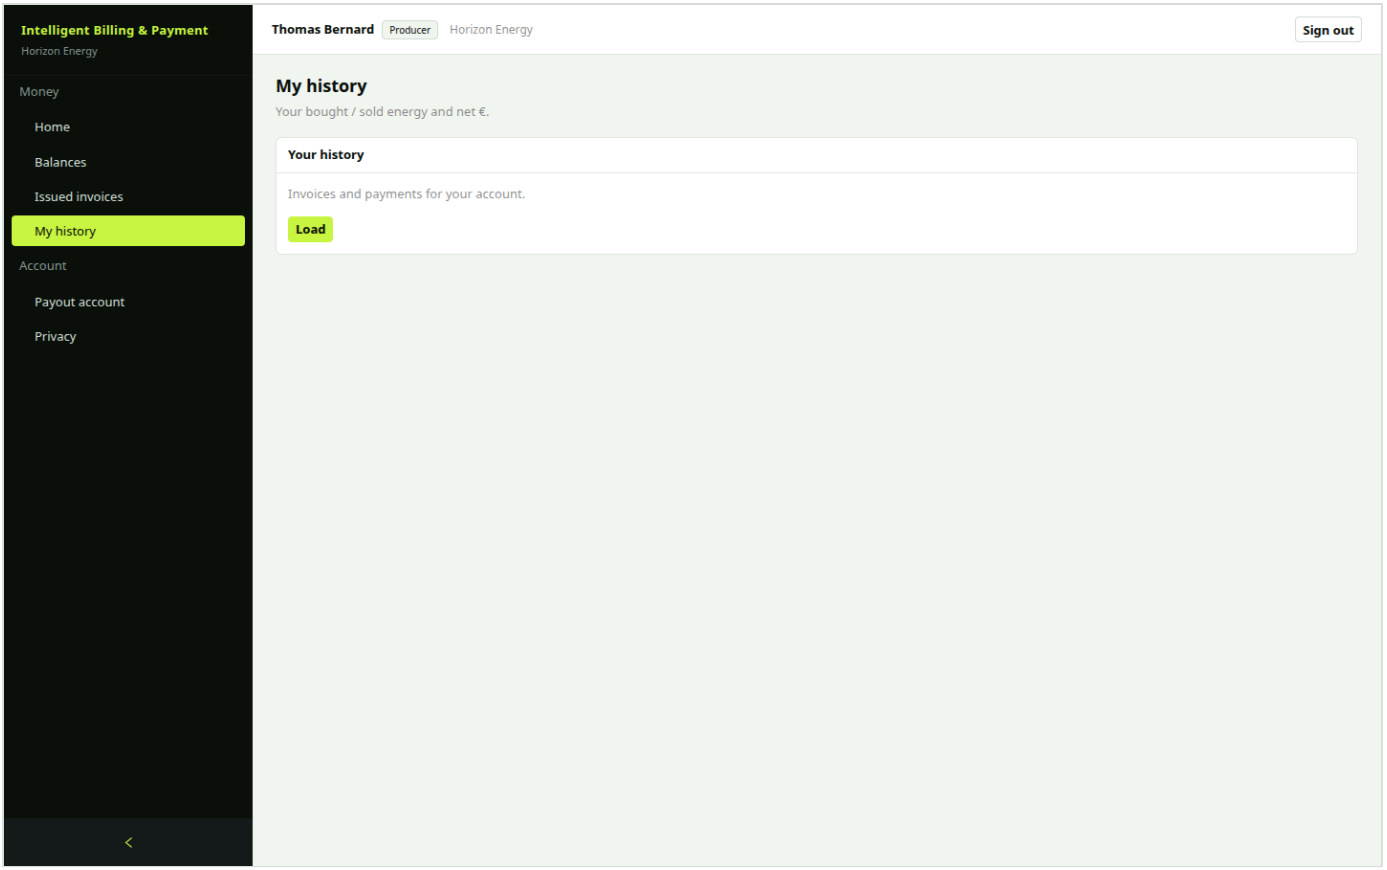

Champ	Valeur

- [ ] KYC Claire OK

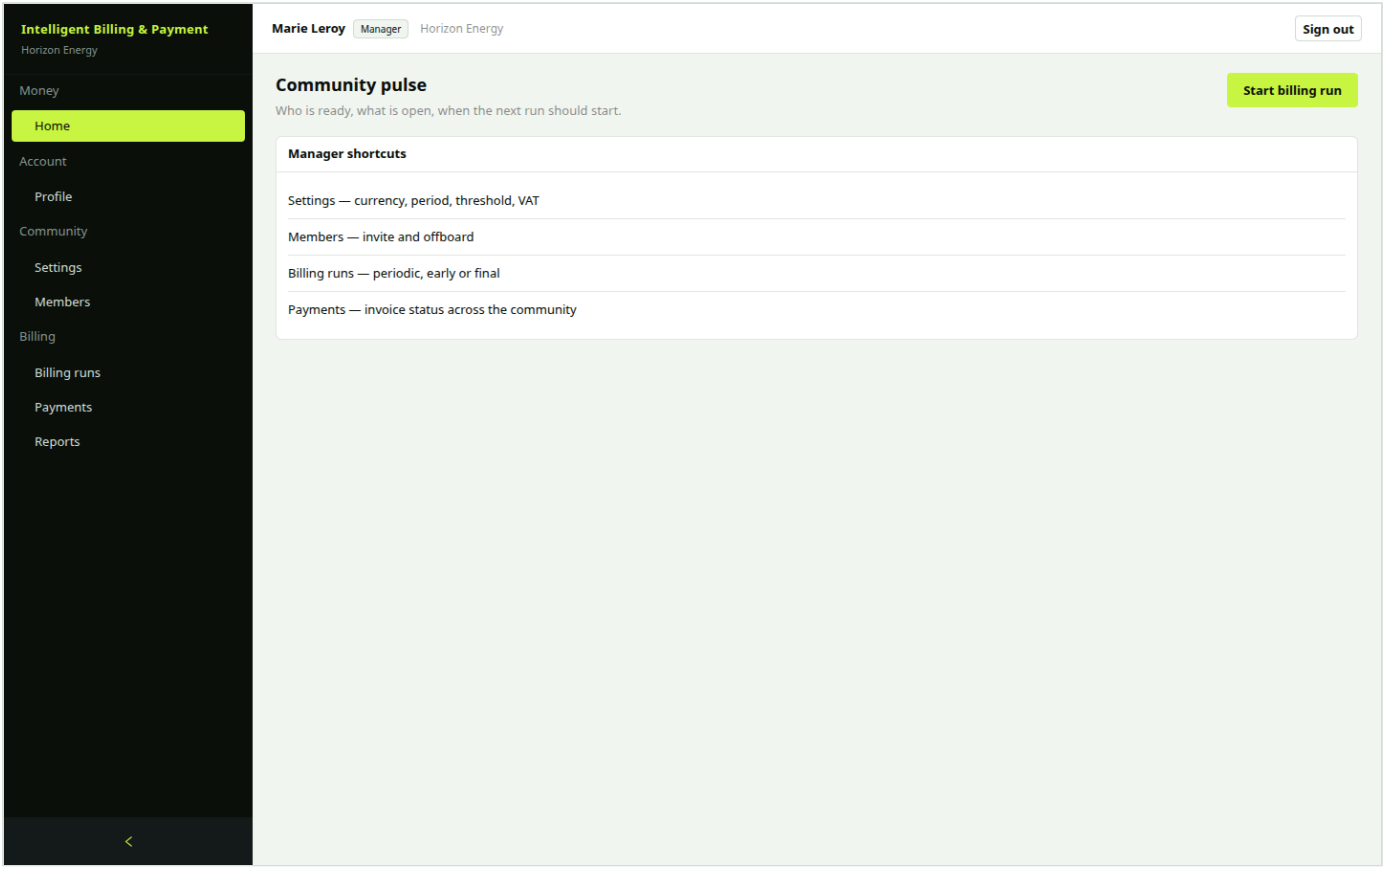

---

6. Marie Leroy — Gestionnaire

Titre Home = **Community pulse** (pas seulement « Home »).

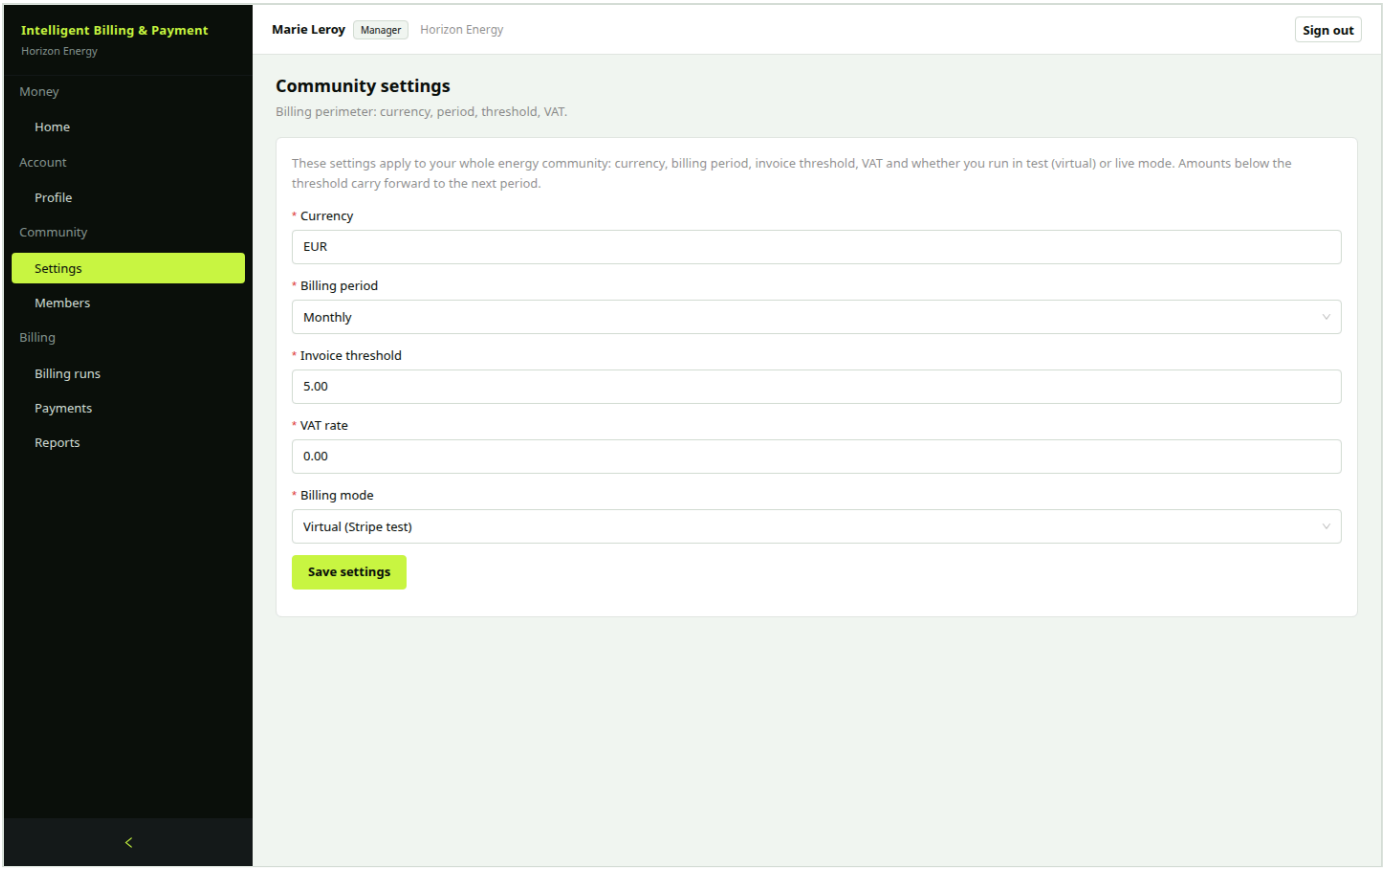

6.1 Login / Home

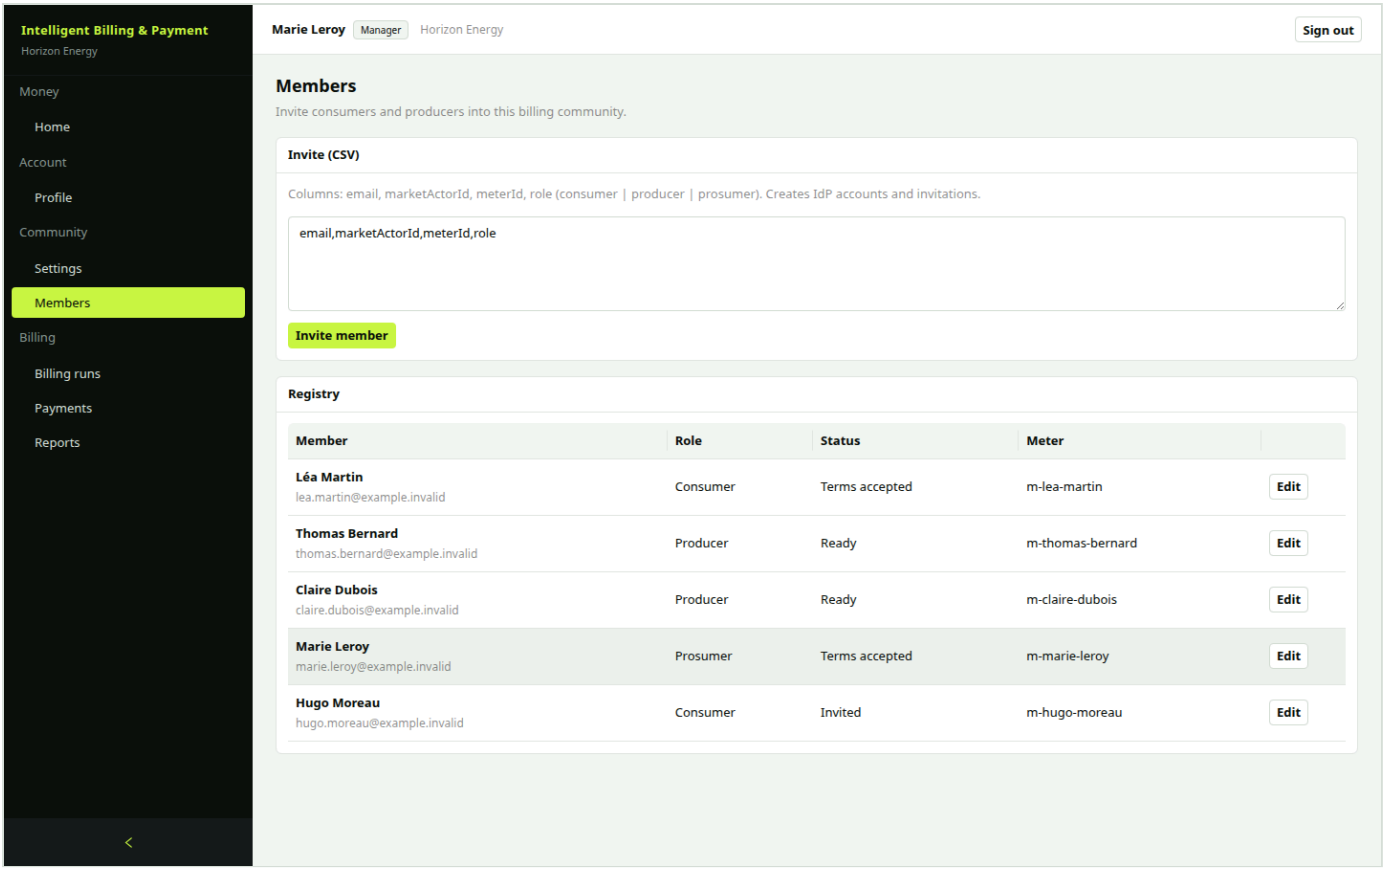

- [ ] Marie Leroy / Manager / Horizon Energy + sider

6.2 Community settings (formulaire chargé)

- [ ] Formulaire currency / period / threshold / VAT visible (**pas** un spinner)

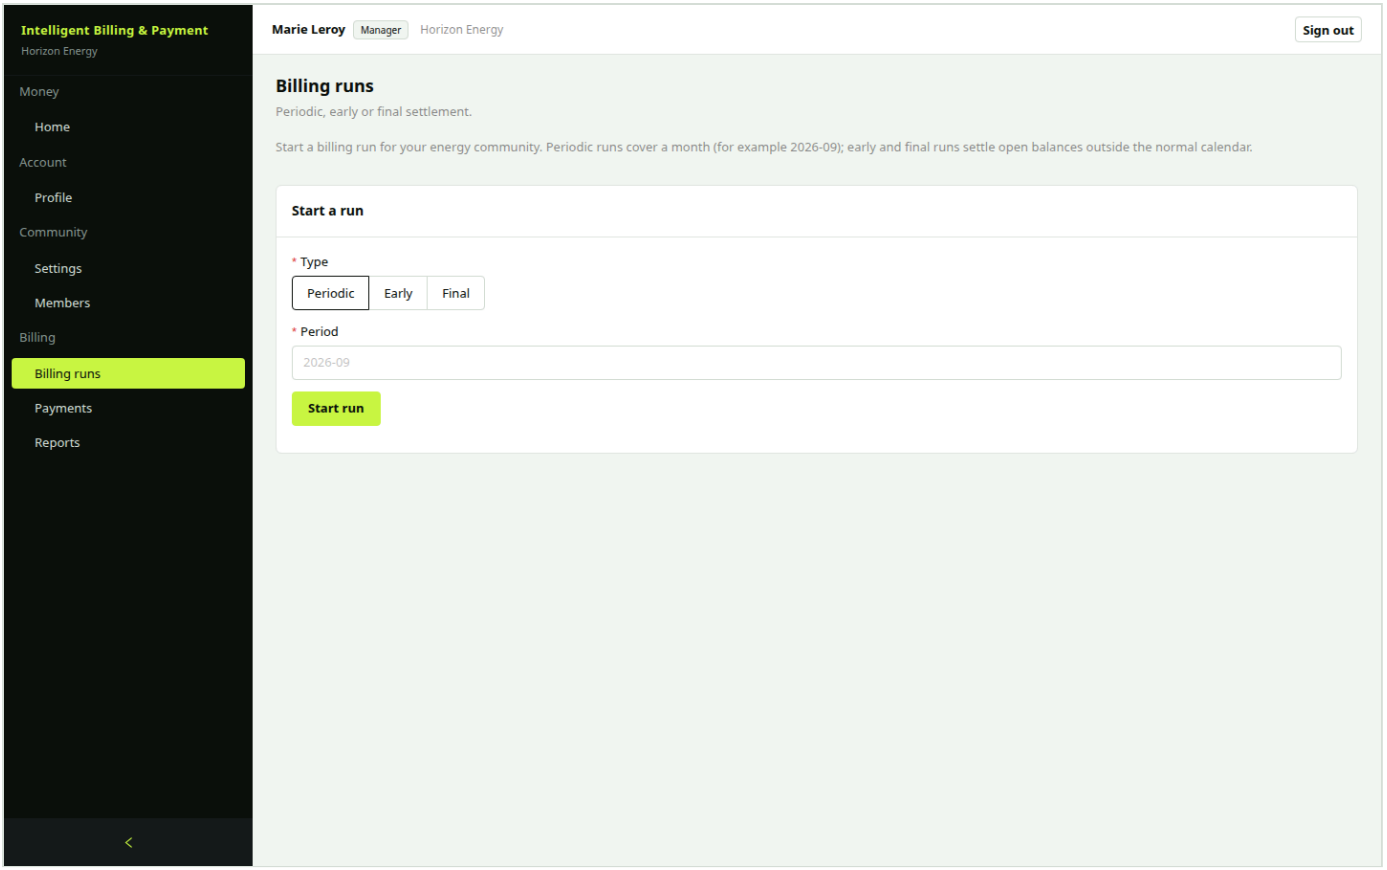

6.3 Members

- [ ] Léa, Thomas, Claire, Marie, **Hugo Moreau** listés par nom

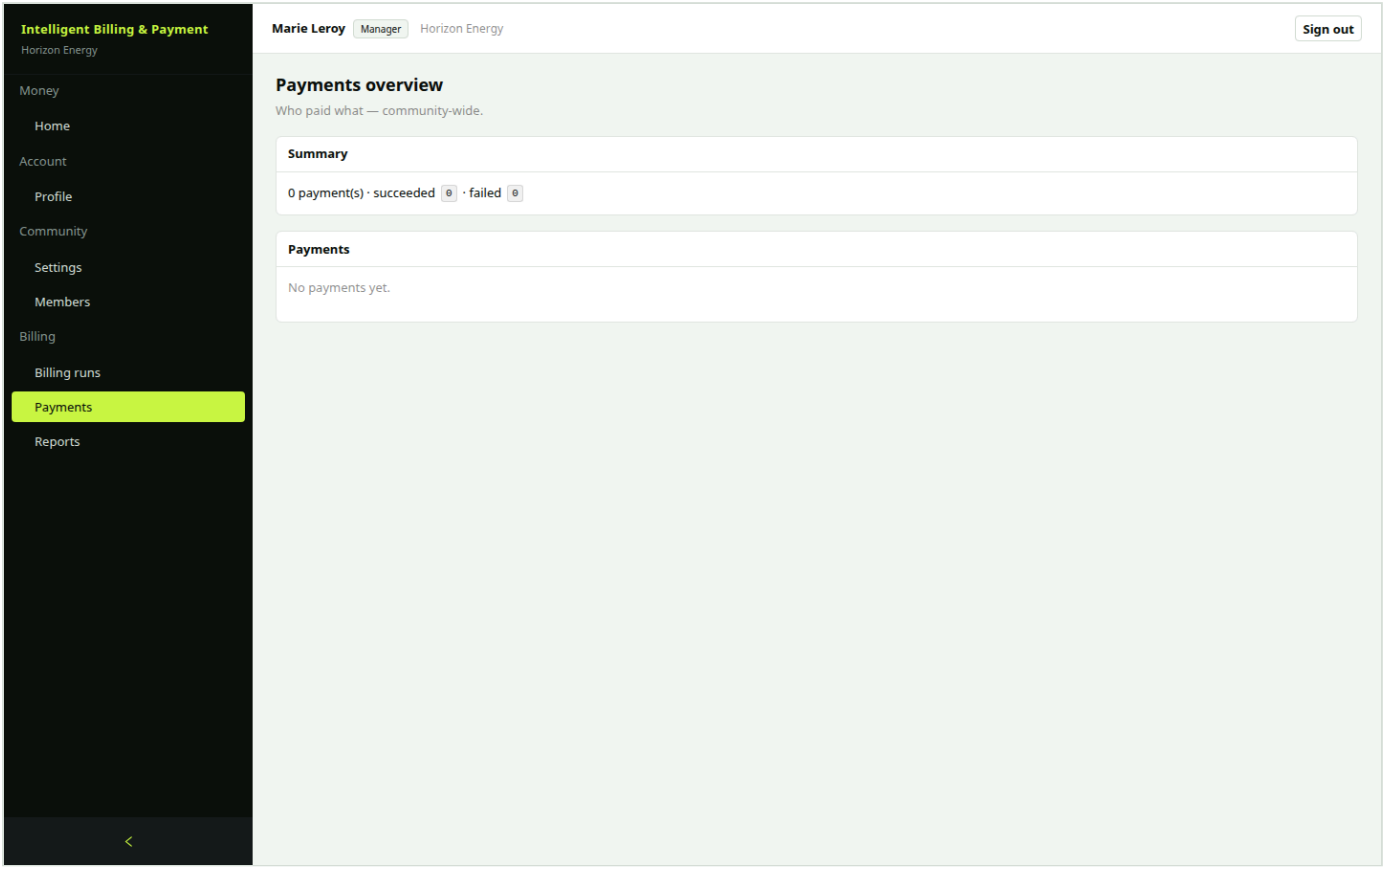

6.4 Billing runs — Early

Champ	Valeur
Type	Early
Period	vide

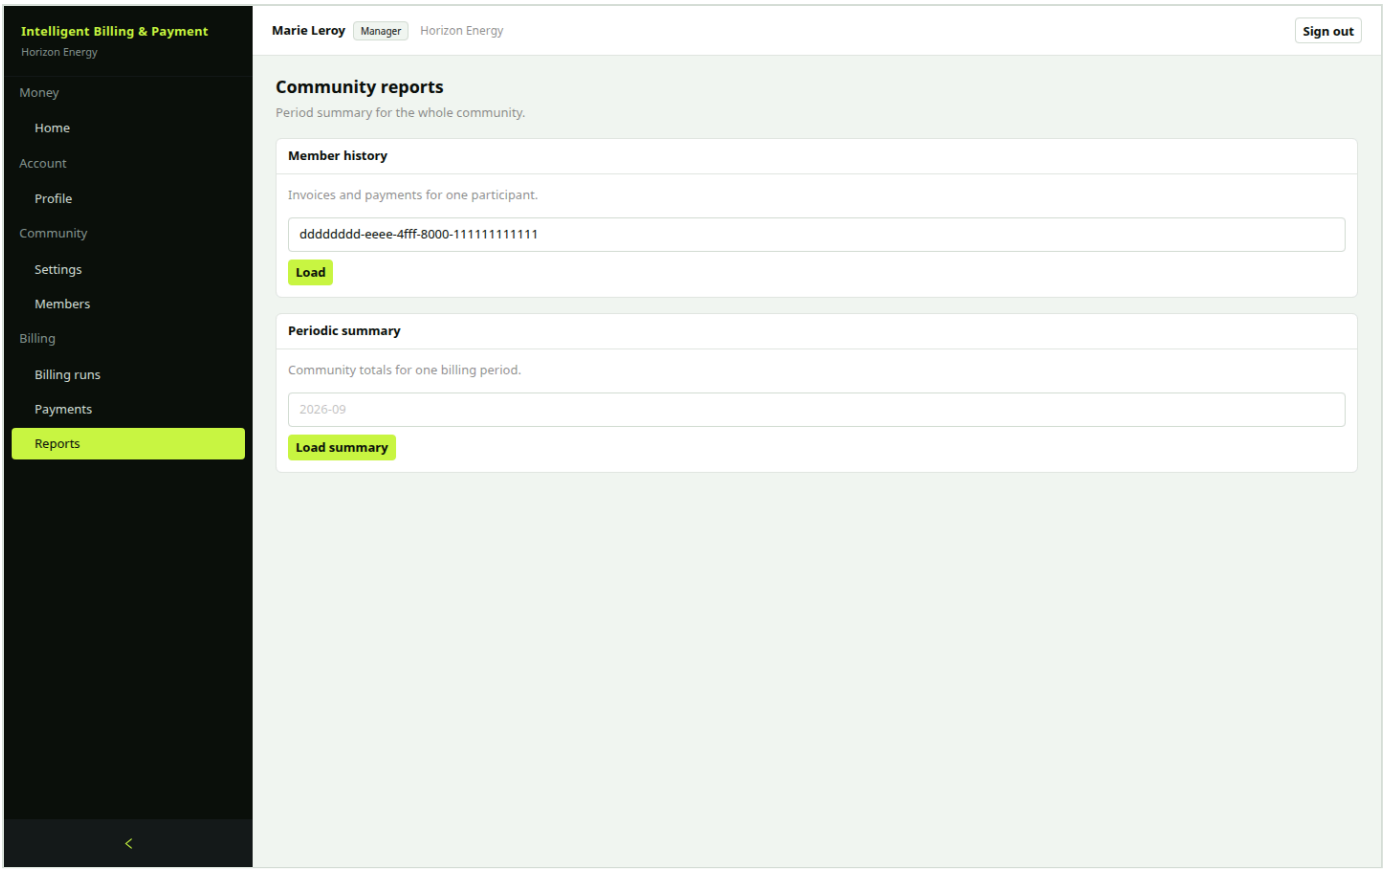

- [ ] Start run → **completed**

6.5 Payments overview

> « No payments yet » / compteurs à 0 = empty state **OK** tant qu'aucun Pay Léa. Spinner seul = capture invalide.

6.6 Reports

---

7. Parcours C — Invite CSV (Marie → nouvel invité)

REQ-008 / UAT-008. La manager crée un compte IdP + envoie l'invitation ; le membre complète ensuite le même wizard que Hugo (parcours A).

Prérequis

- Connexion **Marie Leroy** (`marie.leroy`)
- Accès Mailpit (catcher SMTP du cluster) pour lire le mail d'invitation :

`kubectl -n int-apps port-forward svc/mailpit 8025:8025` puis http://127.0.0.1:8025

- E-mail **unique** (ne pas réutiliser un login déjà seedé)

Données CSV (exemple)

Coller dans **Members → Invite (CSV)** (colonnes : `email,marketActorId,meterId,role`) :

```text
```

email,marketActorId,meterId,role

camille.rousseau@example.invalid,actor-camille-demo,meter-camille-demo,consumer

```

| Champ | Valeur démo |
|---|---|
| email | `camille.rousseau@example.invalid` (ou autre unused) |
| marketActorId | `actor-camille-demo` (unique) |
| meterId | `meter-camille-demo` (unique) |
| role | `consumer` (ou `producer` / `prosumer`) |

## Étapes

| # | Action | Attendu | Pass |
|---|---|---|---|
| C.1 | Marie → **Members** | Liste (Léa, Thomas, Claire, Marie, Hugo…) | [ ] |
| C.2 | Coller le CSV + **Invite member** | Message import OK ; nouvelle ligne **Invited** | [ ] |
| C.3 | Ouvrir Mailpit | Mail Keycloak (VERIFY_EMAIL / UPDATE_PASSWORD) vers l'e-mail CSV | [ ] |
| C.4 | Suivre le lien → définir mot de passe | Compte utilisable | [ ] |
| C.5 | Login app avec le nouvel e-mail | Home Invited / wizard (pas de sider — INT-254) | [ ] |
| C.6 | Profil → CGU → carte test | Ready + sider (comme parcours A) | [ ] |

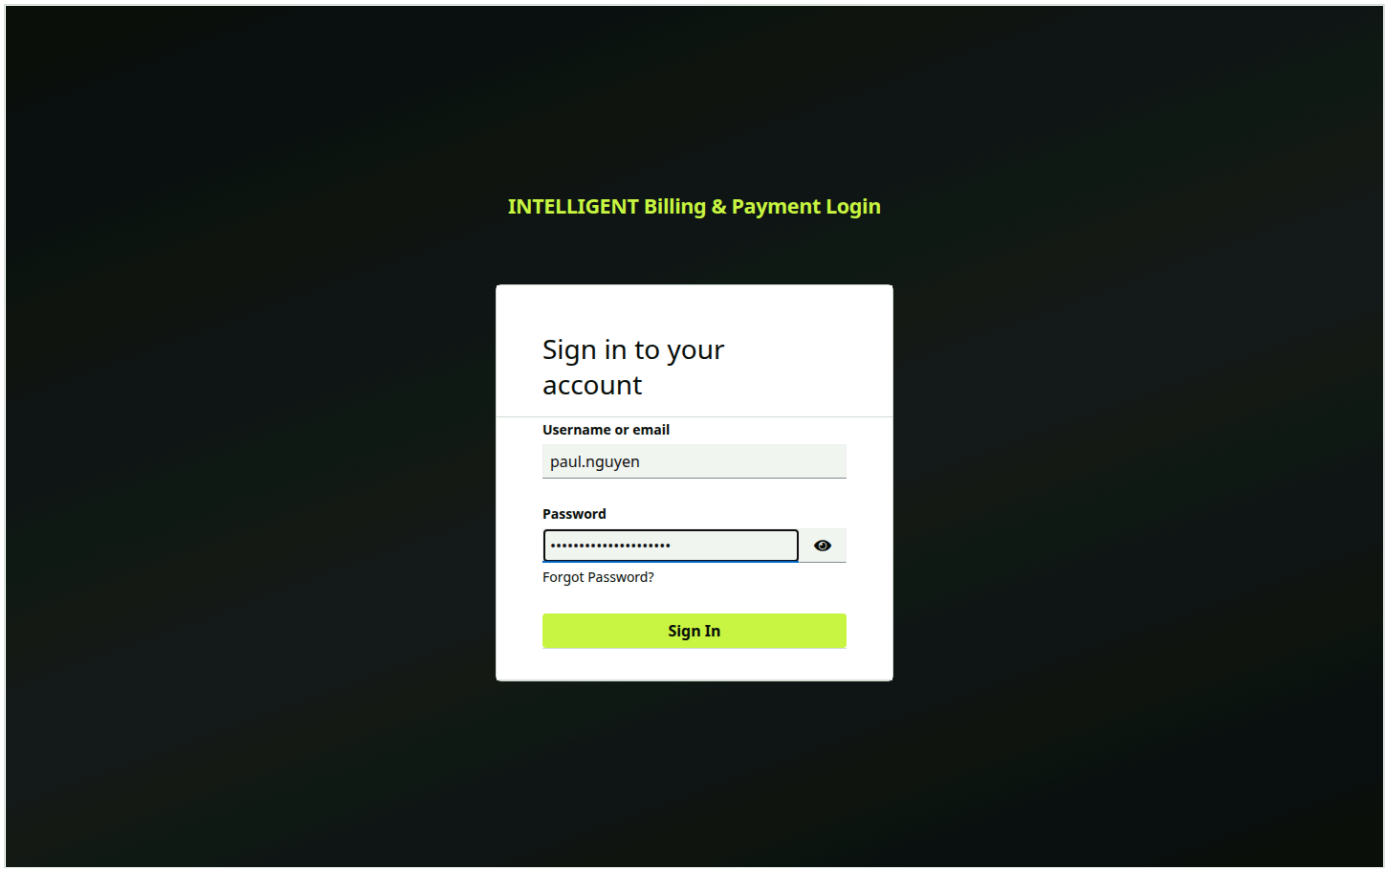

**Points de contrôle IdP (INT-285)** — après invite, le user Keycloak doit avoir :

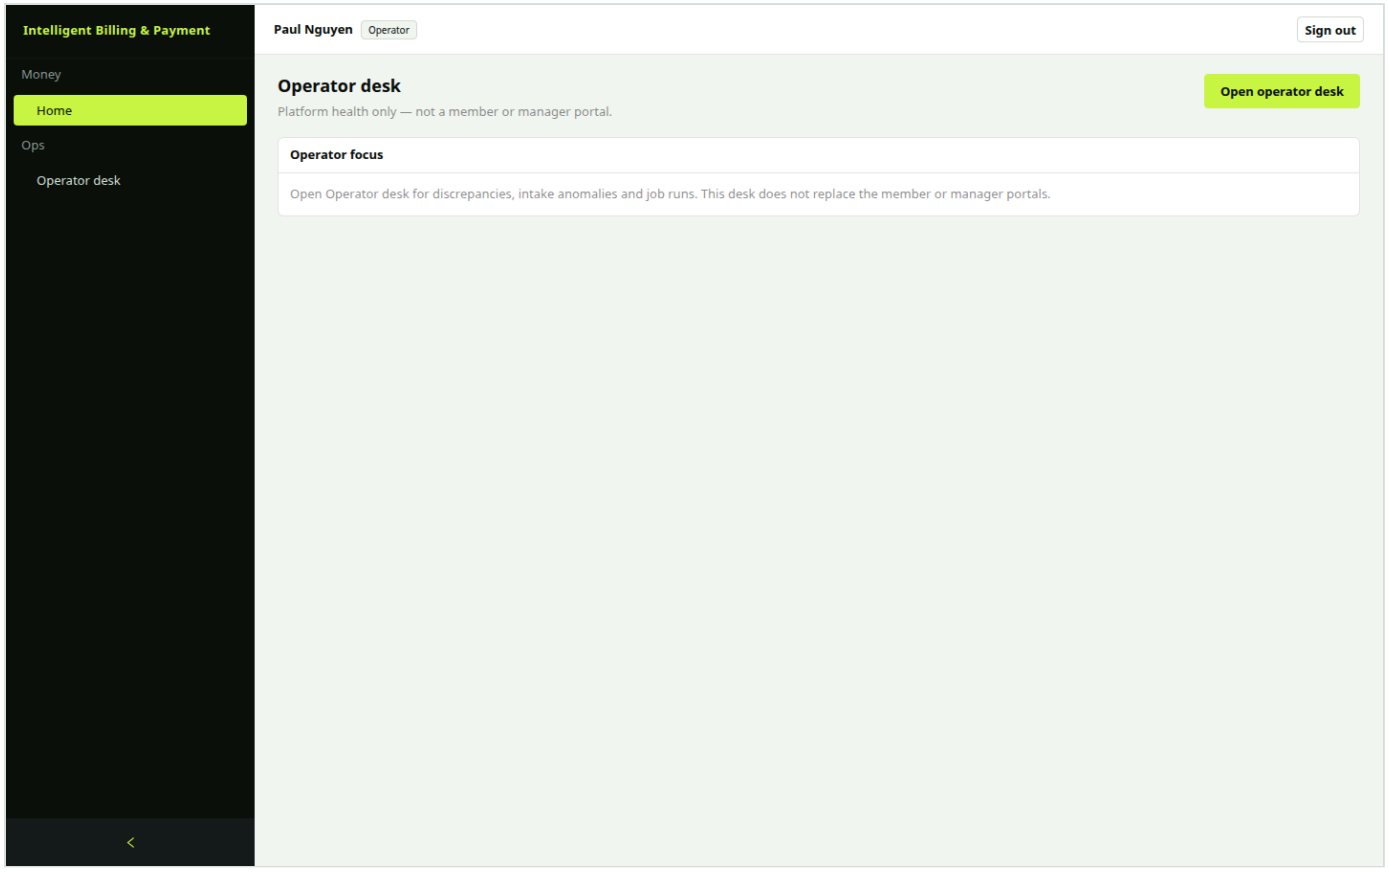

- attribut `community_id` = `c0ffee00-1234-4abc-8def-0123456789ab` (Horizon Energy)
- realm role `member` (pas le rôle marché consumer/producer — celui-ci reste dans le registry)

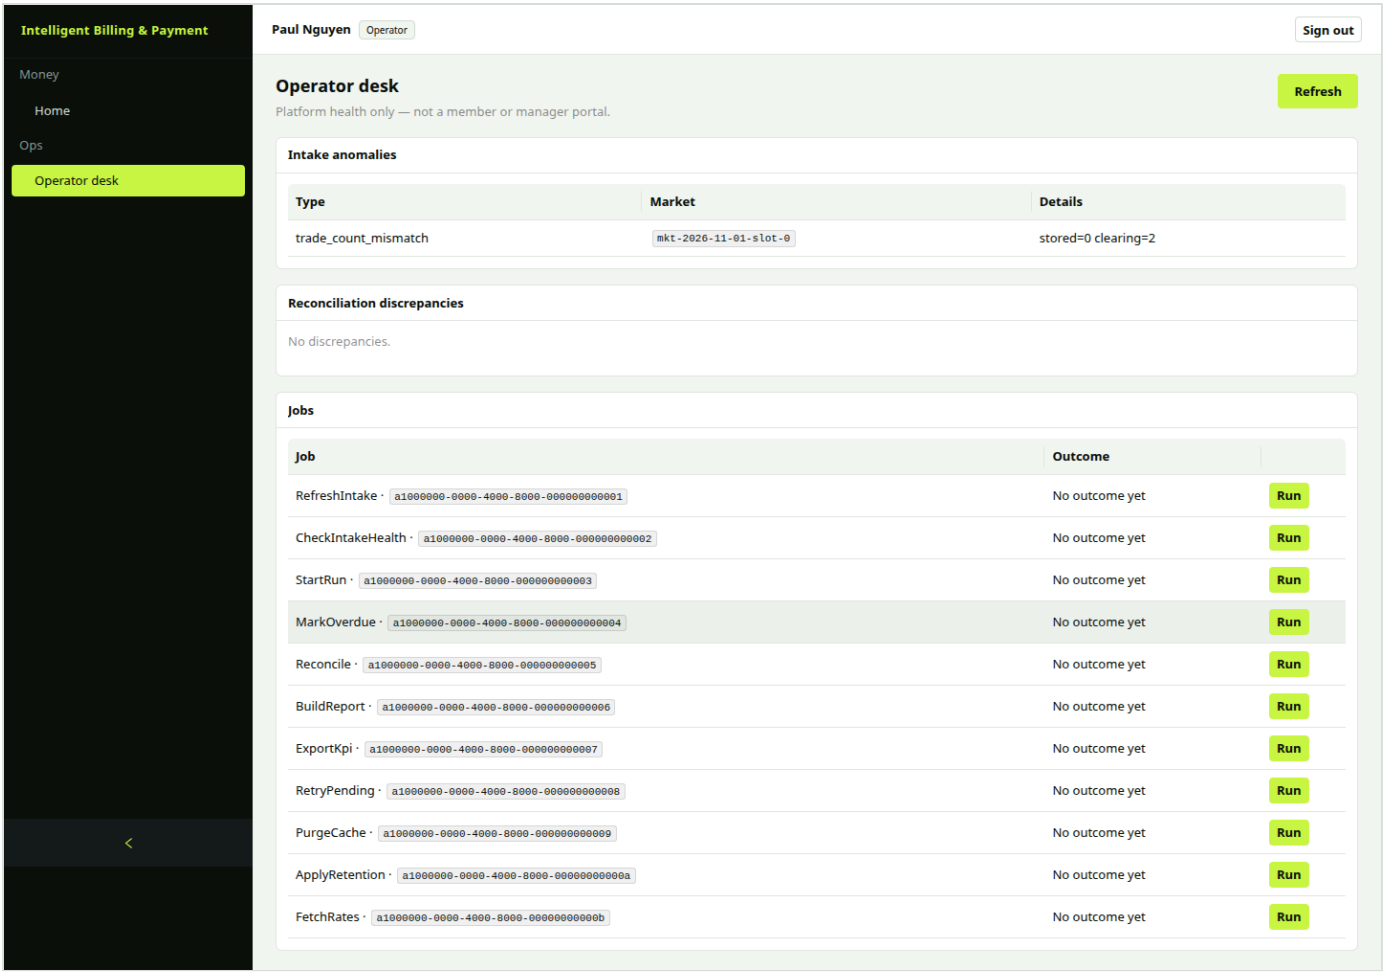

> En démo courte : s'arrêter à C.2–C.3 si le temps manque ; C.5–C.6 = rejoue A avec un compte créé live.

---
```

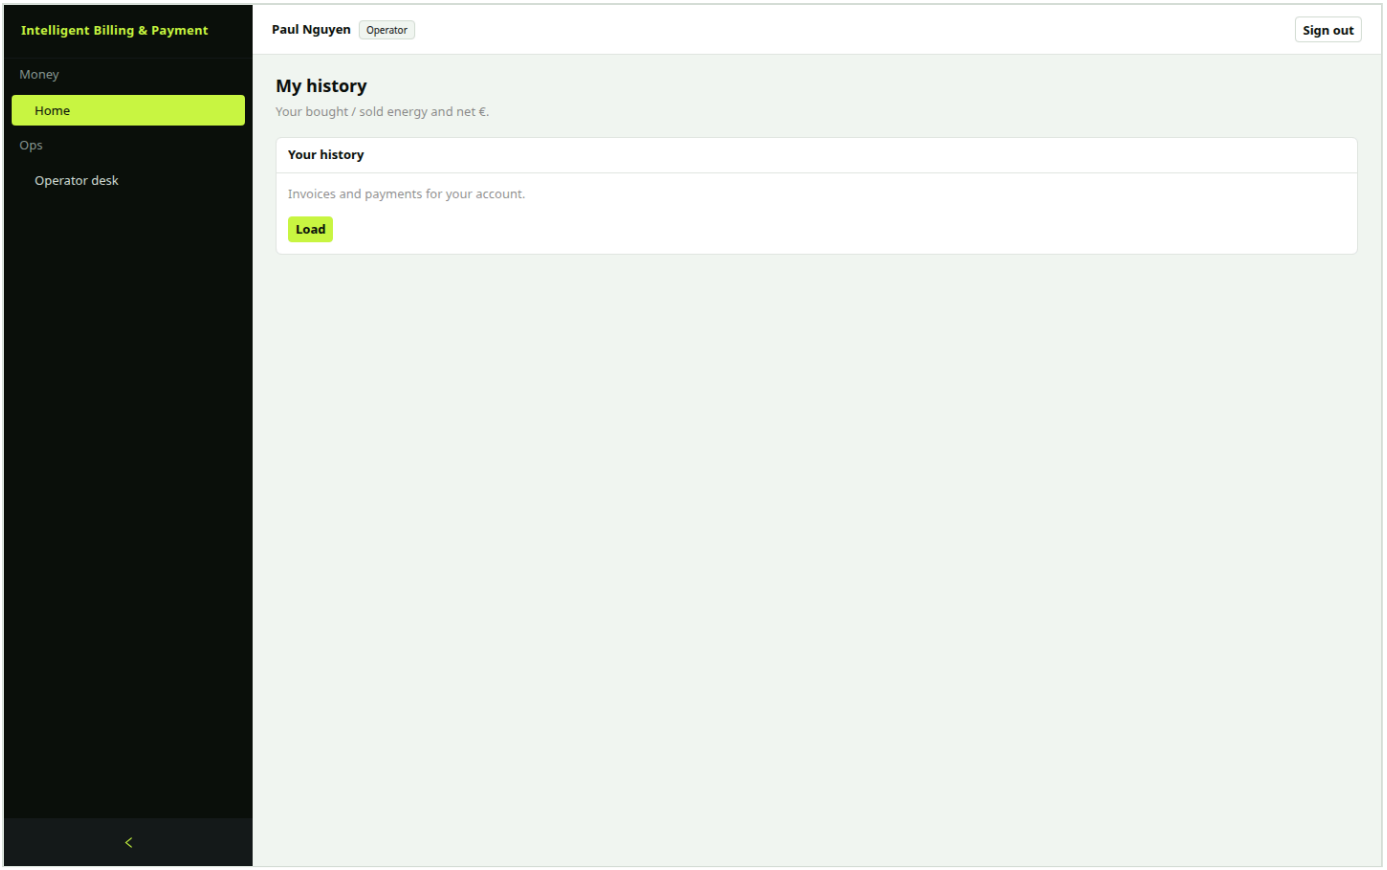

8. Paul Nguyen — Opérateur

- [ ] Menu **Operator desk** ; jobs / anomalies visibles (pas spinner)
- [ ] Membre Horizon Energy **ne voit pas** ce menu

---

9. Ordre démo recommandé (25–35 min)

1. **Hugo** — onboarding Invited → Ready (§2)
2. **Thomas** + **Claire** — KYC si besoin (§4–5)
3. **Marie** — Settings coup d'œil + Early run (§6)
4. **Léa** — payment si besoin → Invoices → PDF → Pay (§3)
5. **Marie** — Payments overview (§6.5)
6. **Marie** — Invite CSV + Mailpit (§7, parcours C) — optionnel si temps
7. **Paul** — Operator desk (§8)

---

10. Référence métier

Élément	Valeur
Community	Horizon Energy (`c0ffee00-1234-4abc-8def-0123456789ab`)
Léa participantId	`11111111-2222-4333-8444-555555555555`
Hugo Invited participantId	`e1000000-0000-4000-8000-000000000001`
Trades démo	`0x8f3a…` (~€2,00) / `0x1a2b…` (~€2,64)
Invite CSV	Members → Invite (CSV) ; mail dans Mailpit (`svc/mailpit`)

---

11. Pass / Fail global

Zone	Pass si…
Onboarding	Hugo part de Invited, aucune case déjà verte
Argent	Léa paie des factures Open après run Marie
Invite	CSV → ligne Invited + mail Mailpit + `community_id` IdP
Setup chrome	Pas de sider avant Ready ; sider après
IdP Volt	Titre **INTELLIGENT Billing & Payment Login** au-dessus du form centré (CTA lime)
Captures	Pas de spinner présenté comme écran final
Members	Noms humains dont Hugo Moreau

---

12. Fichiers

Fichier	Rôle
`README.md`	Index
`assets/demo-workbook/`	PNG
`scripts/capture-demo-workbook.mjs`	Recapture (`wait` anti-spinner) — INT-333
`scripts/export-cahier-pdf.mjs`	Régénération PDF A4 — INT-333
